NEW PRODUCTS

SHOWER DRAIN

QuickDrain USA's WallDrain is engineered to sit flush along the wall, creating a sleek and unobtrusive look that is nearly imperceptible yet highly efficient. The drain features a 316L stainless-steel body with the company's Sure Flow System that leaves no standing water in the drain body. A sloped trough removes all water and debris from the trough after each use. Available in 48", 72" and 96" sizes with trough extensions available to adjust the length for an exact fit.

BOILER CONTROLS

All Laars commercial NeoTherm boilers now come with a large color touch screen as standard equipment, allowing for quick access to the control's full functionality. The new VARI-PRIME variable-speed boiler pump control option also is available and optimizes total installed efficiency by matching boiler input modulation to pump flow. The fully packaged 95% efficient commercial NeoTherm line is available from 285 through 1,200 MBH sizes as a modulating boiler or volume water heater.

HYDRAULIC QUICK DISCONNECTS

Midland Metals expanded line of hydraulic quick disconnects includes the Wing Nut and Flat Face ISO 16028 interchange. The 61Series wing nut is a heavy-duty thread-to-connect quick coupling capable of containing a variety of fluids. Midland's Flat Face FF series steel quick disconnect couplings are interchangeable half-for-half with other brands meeting international ISO 16028 dimensional requirements.
