Product Focus: Drains

Linear shower drain

LUXE Linear Drains' 100% stainless steel Roman-style range of linear shower drains is ideal for creating safe, modern barrier-free, zero-threshold, ADA-compliant, easy-to-access, wheel-in-entry showers that provide safe and easy access with style appeal available in six standard sizes ranging from 26" to 60" in length. The entire collection of linear drains, including the Roman style, have earned cUPC product certificate listing from the IAPMO R&T. The drains have been designed to be installed independent of any specific materials and methods for fast, time- and labor-saving installations. **LUXE. www.lineardrains.com**

Square shower drains

Brasstech introduces three new contemporary style square drains to its shower collection. The drains are available in 4" and 6" sizes with 27 decorative finishes to choose from. The drains also come in three contemporary designs to complement brick, hexagonal and diagonal tile patterns. The faceplates secure magnetically to the drain body, simplifying installation and facilitating easy cleaning. Drain bodies are available in cast iron, ABS or PVC materials. **Brasstech. www.brasstech.com**

Channel drains

Jaclo's channel drain systems are made of stainless steel and are available in different styles. Designers, homeowners and others looking to purchase a channel drain can choose a base and drain design of their liking (the zeroEdge Channel Drain body is shown here with the Linear Drain). The new channel drains allow for easy installation, the elimination of the traditional center drain and a sleeker looking shower, the company says. **Jaclo. www.jaclo.com**

Drain design

The Perfect Drain from Elkay is an edgeless drain without a rim. The smooth surface reduces the chance for breakage that can occur when placing glass on a traditional drain. Included with all Perfect Drain sinks is a strainer kit compatible with all InSinkErator disposers. It can easily be installed using the company's Quick Lock mounting system. Available in top-mount and undermount options as well as in both single- and double-bowl configurations, the design is offered on more than 30 popular Elkay sink models. **Elkay. www.elkayusa.com**

Wall shower drain

Quick Drain USA's Wall Drain is designed to sit flush on the wall, giving an unobtrusive look where the shower drain is almost invisible. Ideal for hospitality, residential or commercial spaces, this drain concept fits with today's modern construction methods. The drain consists of a 304 stainless steel channel body and a grate assembly that can be seamlessly adjusted to the thickness of the wall's ceramic tile or stone covering. **Quick Drain USA. www.quickdrainusa.com**
