FOR IMMEDIATE RELEASE:

IMPROVING ON PERFECTION

The updated Cadence II from ICERA puts the finishing touches on exceptional design.

(Los Angeles, CA – May 11, 2015) ICERA understands the perfect balance that exists between form and function, and nowhere is that more evident than in their newest design masterpiece – the updated Cadence II toilet. As the latest addition to their premium line of bath fixtures, the new-and-improved Cadence two-piece toilet takes exceptional design and practicality to the next level with updated seat and lever designs. New bolt cover tiles provide a fully skirted, streamlined look. Still boasting its trademark curves and modern lines, the Cadence brings a sense of sophistication to the bathroom. Created with comfort and convenience in mind, this exceptional toilet is a smart choice for those who value both style and performance.

The Cadence II features ICERA's EcoQuattro flushing technology, boosting its efficiency by as much as 50% over that of traditional toilets. Rated as EPA WaterSense-compliant, the Cadence uses only 1.28 gallons per flush and is capable of clearing 1,000 grams of solid waste per flush. With an oversized fully glazed trapway, clogging is virtually eliminated. A large 9"x7" water spot helps to facilitate cleanliness and odor control, while precision rim jets and a MicroGlaze™ anti-microbial finish makes for an easy-to-maintain bowl. An elongated bowl is situated at chair-height for optimal comfort, while a super-quiet flush mechanism and soft-close seat and cover help ensure peaceful tranquility.

The Cadence is crafted of vitreous china and is available in traditional white and biscuit. All ICERA toilets are 100% factory flush tested and come with a limited lifetime warranty. The Cadence II is available at fine bath showrooms nationwide with retail prices starting at \$465.
