## A New Angle on Sink Design

### *MTI Baths introduces ultra-versatile Incline Counter-Sink*

(Sugar Hill GA - August 16, 2017) Versatility is a hallmark of truly great design and MTI Baths has hit the nail on the head with their latest bathroom sink – the Incline. This extraordinary rectangular basin is notable for its sharply sloped bottom which runs from the front to an integrated slotted drain along the back of the sink bottom. With its sleek minimalist lines, the Incline lends itself to a variety of installations and adds an element of modern elegance to any luxury-minded bathroom.

The Incline is part of MTI's beautiful Boutique Collection of lavatory sinks and is handcrafted of solid SculptureStone™ for a molded stone look that is durable, eco-friendly and easy to maintain. Offering exceptional versatility, the Incline can be utilized as an undermount sink, a counter sink, or a vanity sink in either Parson-style or waterfall style with matching legs on both sides or just one. And the design options don't stop there. Customers can also specify custom lengths with varying depths and deck heights, single or double bowl configurations, and the bowl position in the center or offset to the right or left. The standard size is a generous 19" x 15" in either white or biscuit matte with an optional gloss finish if desired.

"The Incline is our chameleon of sink designs – it can fit in anywhere and look perfectly at home," said Michael Kornowa, Director of Marketing for MTI Baths. "The sloped bottom is quite eye-catching and adds a geometric element that is fresh and unexpected. Between the different options for installation and the size customizations, the Incline is truly one of our most versatile products and ideal for a master suite or powder room."
