

INTRODUCING THE COSMO DRAIN COVER.

QuickDrain USA pays homage to the late architect and icon Michael Graves.

Cosmo in Polished Stainless - by Michael Graves Design™

(Frisco, CO. March 25, 2015) When you think of Cosmo, you think of style. And that is exactly what the design team at Michael Graves Design was going for with the new Cosmo Drain Cover. QuickDrain USA and Michael Graves Design partnered to create an elevated design detail to a powerful product for accessibility.

The new Michael Graves Design™ Cosmo drain cover features an unmistakable contemporary style that commands attention. Crafted of 304 stainless steel, it is offered in six different standard lengths and is available in brushed or polished stainless steel. Custom lengths for special projects are also available. Ideal for residential, hospitality or commercial spaces, all drains are ADA approved and easy to install.

The new Cosmo drain cover allows function without compromise. QuickDrain USA offers a shower pan system that can be installed in hours, not days like a traditional drain or other linear drains brands. QuickDrain is the only linear drain with an engineered 100% trough slope that is designed to remove all the water and debris from the trough after each use. The company offers a variety of spacers to raise the drain cover based on the tile or material thickness to a height that is flush with the floor. Their linear shower drain system also pre-attaches the waterproof

membrane to the drain body. This is critical to ensuring a water-tight connection at the drain and helping prevent leaks.
