(Frisco, CO. April 28, 2016) QuickDrain USA is proud to showcase their new recycled ShowerLine system at this year's HDEXpo in Las Vegas. Located in Mandalay Bay in **Booth 28226** the company will be debuting the recycled ShowerLine shower pan and their award-winning WallDrain, both sure to inspire visitors!

Not only is the ShowerLine system material revolutionary but it's just one of the many features of this remarkable shower pan. These shower pans are suitable for both interior and exterior use and can be used with either sheet or liquid topical waterproofing. Faster and easier to install these pans eliminate the need for traditional mud beds, as the 2% slope has been incorporated into the panel.

Available in six standard sizes and four outlet configurations, ShowerLine offers the same flexible linear drain solution for both new and retrofit applications.

The award-winning WallDrain also represents the latest innovation in linear drain design from QuickDrain USA. This revolutionary system allows for the most seamless design possible – by installing the drain in the wall itself and sloping the shower floor to one subtle channel, there will be absolutely no disruption in the shower design. It features an internally sloped drain configuration, on-site adjustability and installation flexibility. Ideal for hospitality or commercial applications, WallDrain is ADA approved and easy to install.

About QuickDrain USA

QuickDrain USA is a premier manufacturer of stainless steel, and PVC low profile channel drainage systems for showers and wet areas. The company is providing drain solutions to high-end hotel chains, large metropolitan hospitals and everyday homeowners who are looking for a universal drainage system with beauty, function and affordability rolled into one easy-to-install product. All of the company's products are designed to meet Uniform Plumbing Code and International Plumbing Code standards and approvals.
