

A WHOLE NEW TAKE ON KITCHEN DESIGN

Kitchen Workstation Furniture brings new flexibility to culinary spaces

(Catasauqua, PA – November 29, 2017) In today's world of modern design, creating the perfect room is all about filling an open floor plan with beautiful furnishings. YesterTec is proud to bring that design freedom to the kitchen, replacing traditional "permanent" cabinetry and appliances with extraordinary Kitchen Workstation Furniture (KWF). Grouped together or as stand-alone pieces, they provide the full spectrum of kitchen functionality while delivering exceptional good looks, discrete storage and unprecedented flexibility.

The concept of treating the kitchen as a space to be furnished is a rising trend as consumers and designers experience a great "aha moment" in recognizing the benefits of independent kitchen furniture. YesterTec offers an impressive array of classically inspired furnishings to complement a variety of decors, with sizes and specs that can be customized to fit any project or circumstance. Each unit is freestanding, allowing a more efficient use of space and complete freedom in configuring a custom kitchen. with concealed appliances and abundant counter top and storage systems – all integrated into well-crafted, heirloom quality workstations.

One of the most notable features of YesterTec's KWF designs is the U.L. Listed technology that allows hot appliances to be safely concealed behind closed doors. Their state-of-the-art pocketing door system allows cook tops, stoves, ovens and microwaves to be operational only when the unit's doors are open and stored securely in their pockets. This smart precaution eliminates a potential fire hazard and is an industry-leading development by the YesterTec team.

Kitchen Workstation Furniture allows virtually any room to be used as a kitchen. Group multiple units together to create a complete kitchen, or tuck just one hospitality armoire into a master suite to create a perfect spot for brewing coffee. YesterTec's unique mini-kitchen armoires are a wonderful design solution for executive board rooms, game rooms or in-law apartments.

Discover the design liberation made by possible with Kitchen Workstation Furniture by YesterTec. Create a full kitchen on your own terms with beautiful custom furnishings and everything needed to concoct simple snacks or elaborate dinner parties.
