Weha Buffalo Bundle Slab Storage Rack design has created a six-point post touch locking system. While other slab rack bases touch the pole in one or two places, the Weha Buffalo Slab Rack base creates six different pressure points on the post. This design increases the metal to metal contact from a standard 4 ½ to over 9 ½ inches, doubling the surface contact.

Weha Buffalo Slab Bundle Storage Racks

This world-patented design offers the safest and strongest way of storing stone slabs, including bundles of granite, marble, engineered stone, quartz, quartzite and all natural stone.

This design increases the structural strength by 57%. This translates into a greater weight capacity, with full confidence and worry-free storing of full bundles of granite and marble in both 2cm and 3cm stone.

Each Buffalo Slab Storage base has 14 receivers spaced at 8 ½ inches on center – 6 inches from hole to hole. Included at each end of the bases are anchor holes for securing the Buffalo bundle racks to the floor when required.

The Weha Poles are 2 ¾ x 2 ¾ x 60 inches long fully hot dipped galvanized. Each pole comes with the Weha Signature Safety Angle Bracket. This angle bracket faces the stone and offers a fail-proof way to set the proper angle for the stone to ensure the safest and least amount of weight transfer to the poles.

The Buffalo Poles come with special Lock Notches that securely lock into the base, adding additional structural strength to the poles and weight capacity. Each post comes with white rubber caps for safe and scratch proof storage.

Omax Corporation expands its GlobalMax pump options with a 10HP pump for the GlobalMax JetMachining Centers. Designed for educators, job shops, fabricators and manufacturers who need an economical industrial abrasive waterjet, this new pump delivers 30,000 psi pressure to the cutting nozzle. The GlobalMax product line with the 10HP pump offers all the benefits customers come

to expect from Omax -- innovative drive systems, proven direct-drive pump technology, Intelli-Max software, as well as superior customer service.

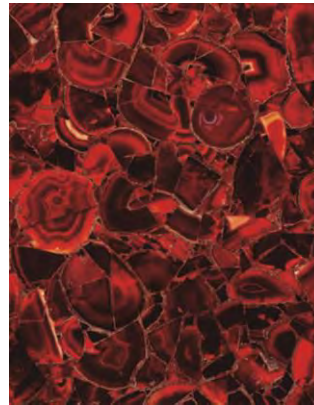

The GlobalMax JetMachining Centers can cut almost any material in any thickness up to 5 inches (0.125 m) without any heat-affected zone (HAZ). A number of compatible accessories are

available, including a terrain follower, a pneumatic drill and a bulk garnet feed hopper.

The GlobalMax 10HP pump is manufactured in Kent, WA, to ensure quality and component compatibility. International Omax distributors are certified installers and servicers and are trained at Omax headquarters.

Intense hues of crimson and maroon found within the *Ruby Carnelian* design are just one of many examples of Mother Nature's intense imagination.

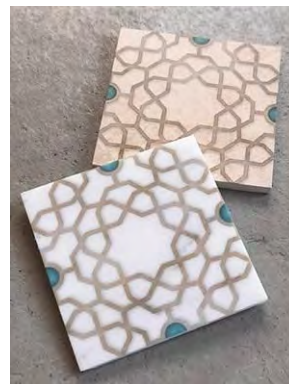

Ruby Carnelian by Antolini

As deep shades of red evoke an overwhelming sense of allure and charm, each slab paints a portrait of infinite scarlet-colored roses blooming in the spring.

Ruby Carnelian's beautiful appearance mimics fiery passion, portraying the vast amount of diversity found within the natural world and reminds us of Mother Nature's assorted beauty. **Antolini** upholds an unmatched standard of Haute Nature within the Gemstone Collection that is sure to live on for an eternity.

The beautiful new **Medina** tiles from *StoneImpressions* – which celebrate Mediterranean culture – are available in luxurious Carrara marble or pristine limestone, and accented with

Medina tiles from StoneImpressions

onyx or turquoise jewel tones for an exotic look that is grounded in timeless style. As part of the Artisan Collection from StoneImpressions, Medina tiles possess a contemporary twist on classic design and are visually stunning with ethereal pops of colors and golden lattice on the stone surfaces. Crafted of only the finest natural stones, the tiles are sealed with a clear three-part acrylic topcoat that is amazingly durable and an ideal choice for some wet spaces, backsplashes and light-traffic flooring. As with all StoneImpressions products, Medina tiles are available in bespoke orders with custom options. They come in both 6- x 6- and 12- x 12-inch sizes and are offered through the company's quick-ship program for timely and hassle-free delivery.
