Refrigerator drawer with small footprint

THOR KITCHEN's 24-in. Refrigerator Drawer is ETL-rated for indoor or outdoor use. Its small footprint provides a solution that fits under a countertop and flush with the cabinets; the drawer can also be utilized as a freestanding product. Holding a temperature between 32 F and 50 F, the drawer features digital controls for convenient settings, bright white LED interior lights, self-close hinges and a no-frost design that maintains uniform cooling. Constructed from 304 stainless steel, its packing capacity is 5.3 cu. ft.

Coordinate, customize pot filler

CALIFORNIA FAUCETS presents a versatile line of Pot Fillers that coordinate with existing Kitchen Collection ensembles. Featuring the same Italian-inspired design and craftsmanship, the pot fillers come in two faucet bodies—one contemporary in style and the other more traditional. Customize the pot filler with 37 handle options and a selection of 30-plus artisan finishes, including 15 PVD finishes with a lifetime guarantee against tarnishing. Folding flat against the wall when not in use, pot fillers have a max flow rate of 4.0 gpm.

Partnership produces in-drawer outlets

WOOD-MODE partners with in-drawer electrical outlet manufacturer Docking Drawer to deliver two Style Drawer Blade powering outlets. Designed to reduce the space behind the drawer box required for hardware—fitting behind the industry standard drawer depth—these in-drawer powering outlets do not compromise the usable drawer space. The Docking Drawer Blade charging outlets can charge up to eight devices simultaneously, while the Style Drawer Blade powering outlets were conceptualized specifically for small appliances and high-powered handheld devices, like hair dryers, stand mixers and tools.

Recycled paper surfacing performs like stone

PAPERSTONE, part of **MODERN SURFACES**, transforms recycled paper into “stone” surfacing that is durable and workable. While it performs like most stone surfaces, the surfacing can be machine- and field-cut using traditional woodworking tools with carbide-tipped blades. Beyond countertop applications, the surfacing can be used horizontally or vertically for exterior cladding, cutting boards and more. Products are certified to Forest Stewardship Council standards and certified food safe by NSF International.

Versatile beer keg cooler

TRUE RESIDENTIAL offers its Beverage Dispenser in 15- or 24-in. models that are UL-rated for indoor or outdoor use. Both models feature the company's 300-series stainless steel interior and exterior, and are available with a wood overlay panel. Unit doors come as left- or right-hinged, and zero-clearance hinging allows for integrated installation. The beer keg cooler can be converted into one of the company's Beverage Centers, Wine Cabinets or Refrigerators through its TrueFlex shelving system.

Hardware provides classic lines

ATLAS HOMEWARES delivers classic lines and an air of luxury with its Kate Collection. The hardware provides a traditional design with a sleek silhouette in four finishes: brushed nickel, polished chrome, polished nickel and warm brass.

Square knobs, offered in 1 1/8- and 1 1/4-in. sizes, feature a beveled edge for visual interest, while pulls complement the look with squared ends and five sizes ranging from 3 to 7 9/16 in.
