

FOR IMMEDIATE RELEASE

MTI Receives Prestigious 2018 European Product Design Award.

For their Ingenious Integrated Deck Designs.

(Sugar Hill, GA. June 29, 2018) MTI Baths is pleased to announce their IDD or Integrated Deck Designs have been awarded a 2018 European Product Design Award. The European Product Design Award™ recognizes the efforts of talented international product designers who aim to improve our daily lives with their practical, well-thought-out creations. EPDA shares their innovative and ground-breaking products with the world.

The Integrated Deck Designs by MTI Baths are customized partial tub surrounds that are constructed according to the desires, needs and spaces of the customer. Available to work with all MTI freestanding tubs, they snugly cradle the tub design without distracting from its aesthetic. Created from MTI's proprietary SculptureStone® material which is 100% solid and 70% organic, the Integrated Deck Designs provide a mounting space for faucets and toiletries and a concealed place for air bath blower motors, while also making cleaning easier.

It is a tremendous honor to win this distinguished European Product Design Award," stated Russell Adams, MTI's President and Chief Design Officer. "This award competition celebrates creative excellence, something our design team strives for with every product design. We are delighted to make our work visible to the international market, and we thank the EDPA for this recognition."

The European Product Design Award honors the best in product design globally with the goal of advancing the appreciation of design worldwide. Each submitted design was evaluated by the esteemed EPDA Jury on its own merit based on form, function and innovation. Winners will be announced during a special awards reception hosted at the ADAM – Brussels Design Museum in Belgium on September 26, 2018.

About MTI Baths.
