

FOR IMMEDIATE RELEASE

## MTI Sinks Shine In 2018 Iconic Awards: Innovative Architecture.

*The Continuum Square Sink and Incline Counter-Sink are Product Winners.*

(Sugar Hill, GA. June 28, 2018) MTI Baths is pleased to announce their TWO product wins in the 2018 Iconic Awards: Innovative Architecture. The Square Continuum and Incline Counter-Sink were named as Selection in the International competition for architecture, interior design, product design and brand communication.

Designed by nationally renowned kitchen and bath designer Matthew Quinn, the **Square Continuum Sink's** ingenious construction re-uses the countertop cut-out to form a faux bottom of the sink, creating an illusion of a seamless design that allows the striations of the counter material to visually flow 'through' the sink. The extraordinary **Incline Counter-Sink** features a rectangular basin that is notable for its sharply sloped bottom which runs from the front to an integrated slotted drain along the back of the sink bottom. The sink bowl is fully and seamlessly integrated into the countertop.

Both are part of MTI's beautiful Boutique Collection of lavatory sinks that are handcrafted of solid SculptureStone™ for a molded stone look that is durable, eco-friendly and easy to maintain.

The ICONIC AWARDS: Innovative Architecture are an international architecture and design competition that focuses on the interplay of disciplines. It honours visionary architecture, innovative products and sustainable communications from all branches of architecture, the building and property industry and the production industry. At its heart: the holistic, consistent presentation of products.
