[PRODUCTS: TUBS + SHOWERS]

GENEROUS TUB

The Pembroke Collection, **Victoria + Albert's** new bathtub-and-basin duo, is a transitional line created in partnership with Italian design firm Meneghello Paolelli Associati. The freestanding tub blends crisp lines and graceful curves and measures 69 ½ by 31 ⅜ by 22 ¾ inches. Available in seven exterior finishes—Gloss Black, Matte Black, Matte White, Gloss White (shown), Stone Gray, Light Gray, and Anthracite—the Pembroke Collection is made from EnglishCast, a proprietary blend of volcanic limestone and resins that the company says is harder and more durable than acrylic. **For more info circle 801**

SHOWER SYSTEM

Showertec, the system from Italian manufacturer **Profilitec**, was designed to include all of the necessary elements to renovate or build a waterproof, maintenance-free shower. In an effort to surpass current standards, Showertec's vapor permeance levels conform to steam-shower requirements; its high-density, pre-waterproofed foam elements cut installation time and are made from recycled materials for environmental friendliness. **For more info circle 800**

PURIFYING TECHNOLOGY

Microbubbles' technology is the latest sensory therapy for wellness and beauty from **MTI Baths**, adding up to 50 percent more dissolved oxygen to the water. The manufacturer claims that the billions of oxygen-rich microbubbles remove impurities from skin and pores, gently hydrating and exfoliating the bather. **For more info circle 803**

TUB AND SHOWER VALVE

Plumbing manufacturer **Gerber** relied upon its 85 years of experience to innovate and improve its latest tub and shower valve, Treysta. The rough-in valve system was crafted to accommodate a variety of requirements and installations. The vertical inlets allow for maximum placement flexibility in the wall and can be installed next to a stud in PEX applications, reducing the need for reframing. **For more info circle 802**

COMPACT TUB

The Wave tub from **Wetstyle** measures less than 58 inches long, enabling it to fit in standard bathrooms measuring 5 by 8 feet. The shape of the freestanding model evokes the movement of the ocean and its high back is designed for user comfort. Made from Wetmar BiO, the company's soy and mineral stone composite, the tub is available in True High Gloss or a matte white finish. **For more info circle 804**
