

BEAUTY SET IN STONE

Introducing Medina tiles by StoneImpressions.

for immediate release: 9.10.18

The beautiful new Medina tiles from StoneImpressions let you create an extraordinary design space that celebrates Mediterranean culture. Available in luxurious Carrara marble or pristine Limestone, these intricately patterned tiles are accented with onyx or turquoise jewel tones for an exotic look that is grounded in timeless style.

As part of the Artisan Collection from StoneImpressions, Medina tiles create a memorable focal point that brings charm and personality to a room. Their contemporary twist on classic design is visually stunning with ethereal pops of colors and golden lattice on the stone surfaces. Choose this elegant tile to accent traditional architecture and transform an ordinary design scheme into something truly special.

Medina tiles are perfect for kitchens and bathrooms. Crafted of only the finest natural stones, the tiles are sealed with a clear three-part acrylic topcoat that is amazingly durable and an ideal choice for some wet spaces, backsplashes and light traffic flooring. As with all StoneImpressions products, Medina tiles are available in bespoke orders with custom options. They come in both 6x6 and 12x12 sizes and are offered through the company's quick ship program for timely and hassle-free delivery.

About StoneImpressions

The creative impetus behind StoneImpressions came from artist Melinda Earl in 1994 as she sought new ways to transfer images onto stone. After much trial and error, she perfected a process that eventually led to the establishment of StoneImpressions, a fast-growing enterprise now with over 400 authorized dealers throughout North America. The company offers an extensive line of made-to-order, fully customized patterned tiles and murals. With four different types of stone and an impressive range of designs from traditional to modern, Stone Impressions offers tiles to complement any décor. A proprietary sealing process ensure long-lasting beauty and easy maintenance.
