INDUSTRY [NEWS]

chrome, the brass PULSE tub filler easily connects to your water source below the finished floor. The pressure balanced valve and diverter are positioned conveniently to allow you to turn your faucet on/off and pick your desired function, making your bath the best part of your day.

Last but certainly not least is the PULSE ShowerSpas Tru-Temp LED pressure balance rough-in valve with trim kit. The trim comes in three beautiful finishes and complements any PULSE retrofit shower system. It is available in chrome, brushed nickel and oil-rubbed bronze to match your bath décor. This gorgeous valve offers two trims; round and square. The valve utilizes a pressure balancing mixing cartridge to ensure constant water temperature in response to changes in water pressure (e.g., flushing a toilet). The valve also comes equipped with an adjustable hot limit safety stop to reduce the risk of scalding, along with a water power generated LED temperature display to assure your desired temperature every time. The plaster guard is to be used as a guide, making installation easier than ever. For more information please visit www.pulseshower spas.com

LENOVA

INTRODUCING THE TKO TOUCH HANDS-FREE FAUCET LINE FROM LENOVA

Lenova makes a messy kitchen a little neater with their new TKO Touch kitchen faucets. Today's busy cooks will appreciate the easy operation of this elegant contemporary faucet line that allows water to flow with just a simple touch. It's perfect for those times when you're mixing a meatloaf or kneading dough and don't want to touch the faucet handles to wash your sloppy hands. Not only does this ingenious design help keep your kitchen cleaner, it fosters improved sanitation by reducing the potential spread of bacteria from raw foods. A touch of your wrist or forearm on the body of the faucet is all that's needed to activate the water stream. And when you've finished, another short tap turns it off.

The TKO Touch Faucet line is constructed in high-quality, no-lead brass and is coated with a state-of-the-art PVD finish to withstand years of use. Exceptionally beautiful with sleek sophisticated designs, these faucets stand out for their smart features such as automatic shut-off and integrated sensors with LED lights to indicate water temperature for your safety and comfort. And because they are powered by four standard AA batteries, faucet operation will not be impeded by any power outages. The TKO line is available in brushed nickel or polished chrome and includes a pull-down adjustable sprayer and a single lever handle.
