THE NEW WAVE

# NEW + NOTEWORTHY

## DECKORATORS

The new Voyage line of wood-alternative decking features textured embossing, for 34 percent greater traction than competitors, the company says. The line also uses the brand's Eovations technology, which it says contributes to the decking's good strength-to-weight ratio and allows almost no moisture absorption or expansion and contraction. The product comes in four colors ranging from gray to brown.

## THE STERLINGHAM CO.

The bath product manufacturer's new line of single-rail towel warmers can be hung alone, paired, stacked, or arranged for complete design flexibility. Pieces can be ordered in a variety of finishes and custom lengths and are available in seven looks ranging from traditional to contemporary. Tura is shown.

## VINOTEMP

The wine-cooling product maker is entering a new appliance category with the Brama line of all-stainless dishwashers. Operating at 44 decibels, the Energy Star-certified unit has six washing and cycle options, capacity for 16 place settings, and a turbidity sensor for customized cleaning. It offers a flexible racking system to accommodate tall dishes, as well as a third rack. A self-cleaning multi-filter reduces the amount of water needed for each load.

## AMERICAN STANDARD

The Flash pressure-balance valve allows for installation speed and flexibility with its compact size, included test cap, flat back, and sturdy mount for 2x4 wall installation. Its stub-out connection works with press-connect fittings, eliminating the need for additional solder or piping.

## FLIR SYSTEMS

MR59 is a pinless moisture meter that uses a ball-probe sensor to cover larger areas in less time. The ball-probe design makes it easier to measure corners and uneven surfaces and it doesn't leave marks, the company says. Wireless Bluetooth connectivity allows professionals to read moisture levels from a mobile device with the FLIR Tools Mobile app.
