Bath

Designing, ordering integrated counter-sink

MTI BATHS aims to make the customization process for integrated counter-sinks easier with the MTI Configurator, found on its website. The software walks users through a series of choices, including counter dimensions, installation mode, the desired shape and position of the bowl, and faucet configuration. Step-by-step procedures prompt users to consider drain types, edge treatments, and bowl colors and finishes as well. A summary with all part codes and retail pricing plus a “final look” rendering furthers peace-of-mind and easy ordering.

Tubs accommodate deck-mount fillers

JACUZZI LUXURY BATH designs its two latest freestanding bathtubs, the Amalia and Adatto baths, with sleek aesthetics that pair with decks wide enough to accommodate most deck-mount tub filler installations. Featuring generous bathing wells, both bathtubs measure 67-in. long, 34-in. wide and 24-in. high, and include color-matched integral overflow and toe-tap drains. Differentiating the two introductions is their shape: Amalia is oval while Adatto (shown) is rectangular. Each is constructed from high-gloss acrylic reinforced with a fiberglass/resin formula.

Water-saving, ADA-compliant lavatory faucet

The Olympia i1 Series lavatory faucet from **PIONEER INDUSTRIES** exceeds code requirements with its 1.2-gpm flow rate, while its graceful silhouette and fluid lines fit most styles. In addition to its low-flow technology meeting WaterSense criteria, the single-lever handle is also ADA compliant. Available in polished chrome, PVD brushed nickel and matte black finishes, the lav faucet’s single-hole installation uses 18-in. flex supply lines with 3/8-in. connections. Constructed from brass, the faucet measures 3 3/8 in. from deck to aerator, totaling 4 3/8-in. reach.

Expanded shower-tray solutions

SCHLUTER-SYSTEMS introduces 16 prefabricated, sloped trays for showers with KERDI-DRAIN point drain and KERDI-LINE linear drain. These additional shapes and sizes aim to simplify the tray selection process for custom tiled shower spaces. All shower trays feature integrated KERDI waterproofing on top of the tray, which results in a waterproof and vapor-tight environment when paired with the company’s drains and waterproof walls. KERDI-SHOWER-TT trays are part of this introduction and offer perimeter heights of 1 in. or less for curbless shower entries.

Towel-warmer collection with 10 models

WARMLYOURS announces its Cosmopolitan Collection of towel warmers—which includes 10 towel warmers in a variety of sizes, bar counts, finishes and designs—that is sold only through its authorized dealers. All models in the collection are hardwired and wall-mounted, so no visible wires or cords show once installed. Built-in TempSmart protection comes standard to prevent units from overheating. Three timer control options are available: the Hardwired 4-Setting Countdown Timer, the Hardwired Programmable Timer and the Hardwired Wi-Fi Switch.

Fully customizable line of vanities

Delivering a bespoke feel, the Urban Collection from **HASTINGS TILE & BATH** offers design flexibility with a multitude of options and finishes. Wall- or floor-mounted, the bathroom vanities can have open or closed side panels, and grooved handles wrapping around three sides can be specified in contrasting colors and finishes. In addition to cabinets available in 45 matte or lacquered finish options, vanity countertops with integrated basin come in 10 cement resin, 11 porcelain or stone, and nine HPL or wood-look finishes.
