# PRODUCTS & LITERATURE

## INVISIBLE LINEAR DRAIN

QuickDrain USA's linear WallDrain allows for a seamless and unique curbed or curbless shower design by installing the drain in the wall itself — rendering it virtually invisible, according to the company. Nearly any solid surface tile can be installed in the drain's magnetic vertical cover. The integrated drain, combined with a pre-sloped shower pan and waterproofing, represents a total shower solution for eliminating leaks and standing water. The ADA- and UPC-approved drain slashes installation time, saves on cost and minimizes impact on customers, the company notes. Onsite adjustability accommodates shower lengths of 26"-96". Made in the USA. **QuickDrain. [www.quickdrainusa.com](http://www.quickdrainusa.com)**

## HYDRONIC HEAT FITTINGS

NIBCO added to its line of hydronic heat press-connect fittings. The PC-705-D forged bronze Press x Press 90° vent elbows are available in 1/2" and 3/4" sizes. The PC607E-2 wrot copper 6-inch extended elbow comes in a 3/4-inch Fitting x Press connection on a 90° elbow. The extended elbow has been specifically designed for use in heating applications to provide a clean transition through the floor or wall. Both the PC-705-D and PC607E-2 have an operating pressure 200 psi and a temperature range minus 20°F to 250°F. The new wrot copper 3/4-inch fin tube stiffener ensures secure connections with the extended elbow. All of the products are lead-free. **NIBCO. [www.nibco.com](http://www.nibco.com)**

# VGH

Victory Series Boiler

Models VGH-299 CH, VGH-399 CH and VGH-500 CH

### FEATURES ~

- Next Generation Stainless Steel Water Tube Heat Exchanger
- Easy Installation & Maintenance
- 3 in 1 vent connector & long vent lengths
- Compact and light weight - All under 188 lbs
- ModBus connection standard
- Cascade control up to 16 boilers
- DHW control options including parallel DHW & CH operation
- Full text control & data log
- Remote access capable

Up to  
**95%**  
Efficiency
