GREEN LINK New KnuckleHead Strut Design greenlinkengineering.com

GREEN LINK Engineering unveiled its redesigned KnuckleHead Strut Support which provides improved performance and more visually appealing aesthetics at the AHR Expo in Atlanta.

The new design features a sleeker look with ribs flanking each side of the head. It is more characteristic of the KnuckleHead style reflecting intricate engineering and mold design.

The new strut head features a 1 1/8 -inch deep cavity for holding a standard steel strut. The new design features a flat surface, instead of the previous curved design, resulting in easier installation and a tighter fit between screw and head. In areas where hurricanes or seismic activity are present, mechanical fastening is often required to secure installations.

Accurate Control with Caleffi's PresCal Compact caleffi.com

The 533H Series PresCal Compact pressure reducing valve (PRV) is precision engineered to deliver accurate pressure regulation. Low internal pressure losses produce superior falloff performance enabling more flow capacity to fixtures.

The valve is ICC-ES certified to ASSE 1003, CSA, NSF 61, and NSF 372 (low lead laws). Available for 1/2" and 3/4" pipe sizes in a variety of inlet connection styles, PresCal's self-contained cartridge with stainless steel mesh filter allows for maximum debris protection and convenient in-pipe cleaning or replacement.

Lenova Introduces the TKO Touch Hands-free Faucet Line

lenovasinks.com

Lenova makes a messy kitchen a little neater with their new TKO Touch Kitchen Faucets. Today's busy cooks will appreciate the easy operation of this elegant contemporary faucet line that allows water to flow with just a simple touch.

The TKO Touch Faucet line is constructed in high-quality, no-lead brass and is coated with a state of the art PVD finish to withstand years of use. These faucets stand out for their smart features such as automatic shut-off and integrated sensors with LED lights to indicate water temperature for your safety and comfort. And because they are powered by four standard AA batteries, faucet operation will not be impeded by any power outages.

The TKO line is available in Brushed Nickel or Polished Chrome and include a pull-down adjustable sprayer and a single lever handle.
