2019 HOUSING GIANTS

SPECIAL REPORT:

THE LARGEST BUILDERS, RANKED / 30
ON-SITE CYCLE-TIME SOLUTIONS / 48
DIVERSIFICATION FOR MIDSIZE COMPANIES / 54

ELEGANT HARDWARE

In collaboration with WUX Luxury Furniture, PullCast designed the Flow door pull (shown, in polished brass) and Nouveau drawer handle for its Earth Collection, to offer organic shapes that convey sophistication, movement, and “the fine art of detailing,” the manufacturer says. Flow is styled like a tree branch, while Nouveau replicates the look of flowing water. **For more info circle 801**

SOFT-CLOSE ORGANIZER

The 449 Series from Rev-A-Shelf includes the Bottom and Side Mount Soft-Close Base Organizer (shown), and the Bottom and Side Mount Soft-Close Utensil Bin Base Organizer. Featuring natural maple construction and Blum Tandem Soft-Close slides, the system is designed for 9-inch or 12-inch wide, full-height base cabinets, offers three shelf units, and is TSCA Title VI compliant. **For more info circle 802**

TRANSITIONAL VANITY

Three long drawer fronts with metallic trim cut an elegant figure in The Furniture Guild’s latest transitional vanity, Lydia. With double drawer pullouts hidden behind non-sink doors and a third pullout for added storage, the vanity is sized from 24 to 72 inches wide in single- or double-bowl configurations, with optional glass dividers and LED lights. **For more info circle 803**

ALUMINUM FRAMES

Inspired by the European trend of blending metal-frame shelving with wood and metallic finishes, Wood-Mode launched new system profiles with aluminum frames from manufacturer Element Designs. The frames can be used in open or closed, glass or wood shelving applications in a choice of seven aluminum framed finishes, including Matte Black and Metallic Gold. **For more info circle 804**

STEEL DRAWER SYSTEM

The Dura-Close cabinet drawer system from Hardware Resources can be used with frameless or face-frame cabinets. Constructed with double-wall solid steel drawer boxes, finished with slate-gray powder coat, and built on full-extension, soft-close 100-pound dynamic weight rating undermount slides, the system’s wall profile is ½ inch smaller to provide more storage space than traditional A-frame metal-drawer box systems. **For more info circle 805**
