◀ WallDrain from QuickDrain Offers Innovation and Functionality quickdrainusa.com

WallDrain from QuickDrain USA offers a different concept in shower drains featuring an elegant linear design, but with no decorative metal components. Instead, water exits via the downward slope of the shower pan into a drain channel concealed behind the base of the wall, rendering WallDrain virtually invisible.

WallDrain can adapt to almost any existing plumbing condition and can accommodate a poured shower pan or QuickDrain's own Quickslope PET (polyethylene terephthalate) rigid-foam panels. WallDrain is ADA-approved, meets all Uniform Plumbing Code and International Plumbing Code standards, and meets or exceeds ASME A112.18.2-2005.

Gen-Eye Micro-Scope2 for Small Line Inspections ▶ smartplumbingproducts.com

The Gen-Eye Micro-Scope2 offers a compact design along with a new Command Module that features a large 7" monitor and USB port to record video inspections onto a flash drive. Inspect 1.5" to 3" drain lines, toilet traps as well as ducts, furnaces, crawl spaces and other hard-to-reach locations using the included 3' Probe Rod. 4X digital zoom lets you take a closer look at the action, while the 4-hour battery lets you inspect lines remotely. Command Module also features voice-over, date & time stamp, battery strength indicator, and flash drive capacity indicator. The Command Module attaches to the 100' micro push-rod reel with an adjustable mount for optimal viewing angles.
