## SJE Rhombus Redesigns Popular 122 Panel

[sjerhombus.com](http://sjerhombus.com)

SJE Rhombus recently redesigned the Model 122 single phase duplex control panel to include more user-friendly features and a new enclosure style.

The Model 122 control panel now includes SJE Rhombus' new easy-to-use duplex controller. The controller, which features a sleek, protective housing, includes a pump selector switch, 3-second lag pump delay to prevent simultaneous pump activation, alarm activation, built-in pump and float diagnostics and easy field programmability.

SJE Rhombus redesigned the NEMA 4X rated enclosure to include a drip shield for added protection from

environmental elements, heavy duty wide clamping latches, a low profile hinged padlockable cover and integral mounting flanges.

## EVERLOC+ Compression-sleeve Fitting Line Expands

[everlocplus.com](http://everlocplus.com)

The REHAU EVERLOC+ compression-sleeve fitting system has 26 additional configurations making transitions between pipe sizes more convenient in plumbing and hydronic piping. The system comprises RAU-PEX PEXa pipe in 3/8- to 2-inch diameters, polymer and lead-free brass fittings and power tools for reliable, safe, and cost-competitive connections.

Designed for no-leak security, the two-step fitting expansion and compression process is performed quickly in any weather, making installation faster than copper and other PEXa cold-expansion fittings. The NSF/ANSI 14&61-certified system delivers safe drinking water with no mineral build-up and is backed by a 25-year limited warranty.

## QuickDrain ProLine Stainless Steel Linear Shower Drain Offers Ease of Installation

[quickdrainusa.com](http://quickdrainusa.com)

Ideal for tub-to-shower conversions in hospitality, healthcare, and luxury master baths, the ProLine linear drain from QuickDrain USA offers installation flexibility. The integrated drain, combined with pre-sloped shower panels and waterproofing accessories, represents a total shower solution for promoting effective and efficient drainage.

The ADA-compliant and UPC-approved drain cuts installation time, saves on cost, and minimizes impact on customers. ProLine drains accommodate finished shower dimensions from 32 to 72 inches.

## ICERA Introduces the Redesigned Karo II One-piece Toilet

[icerausa.com](http://icerausa.com)

ICERA has introduced the Karo II, which incorporates all the features of the original Karo model while adding a squared tank and transitional lines.

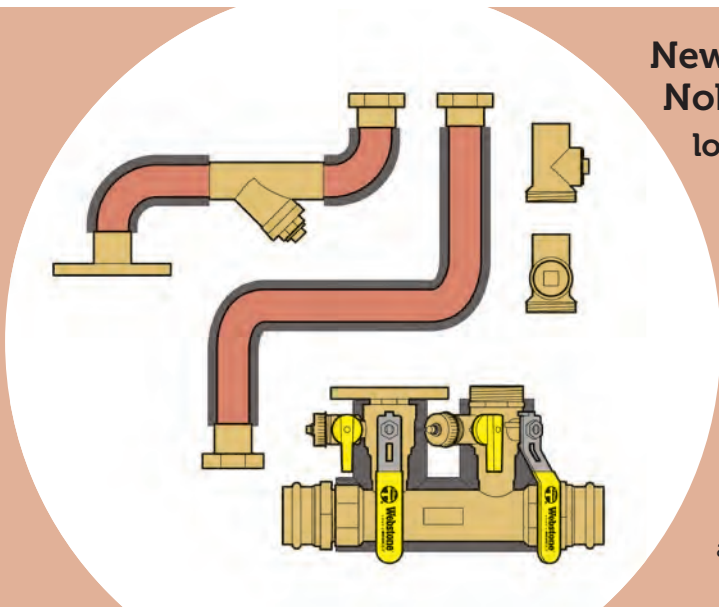

Karo II is a one-piece elongated toilet that features ICERA's anti-microbial MicroGlaze for a finish that offers better hygiene and superior stain-resistance. The skirted trapway gives the design a finished look and allows for easier maintenance. Crafted of white vitreous china, Karo II is ADA-compliant with a chair-height bowl.

## New Hydro-Core NBP Kit for Lochinvar Noble Boiler

[lochinvar.com](http://lochinvar.com)

Webstone has announced new Hydro-Core Complete Near Boiler Piping Kit designed in partnership with Lochinvar for their Noble NKB080, NKB110, and NKB150 boilers. The kit saves time, space and labor with expert-looking results. Fully-fabricated solution includes everything necessary for a successful installation, including insulated manifold with integrated purge and fill valves, copper supply and return lines, boiler connections, and mesh "y" strainer.

## InSinkEerator Introduces Digital Instant Hot Water Tank

[insinkerator.com](http://insinkerator.com)

InSinkEerator has introduced the new Digital Instant Hot Water Tank. Its design features a 100 percent all-welded tank that eliminates the need for seals and o-rings. Additionally, a new digital touch-screen thermostat control lets consumers select the perfect water temperature for their needs—between 190 degrees F and 210 degrees F. The compact tank hangs neatly on the back wall or free standing under the sink; and the two-thirds gallon capacity allows the consumer to conserve energy by heating only what they need.
