A FRESH APPROACH TO HOME & LIFE

ELEMENTS

kitchen detail

The Wane of White

There's no denying the timeless appeal of optic-white kitchens, but color is on the wind. Whether it's navy, turquoise or avocado, try bolder shades against the backsplash. From green and earthier terracotta to vibrant tones, color elevates energy with a positive spirit. arancucine.com

Covered Kitchen Sinks

Great for cleverly adding prep and counter space instantly, sliding covered sinks also boast the double-duty benefit of concealing a sink full of dishes waiting to be cleaned. Food prep becomes more efficient and streamlined. lenovasinks.com

Colorful Grout

This is simple and packs a punch! Go for the unexpected and select a distinct color for grout work as it'll lend your kitchen decor a graphic kick and hints of needed color. groutshields.com
