Weldable Shaft Collars and Couplings Solve Design and Maintenance Problems

staffordmfg.com

A line of shaft collars, couplings, and mounts machined from ANSI 1018 steel and stainless steel to let users fabricate their own special parts has been introduced by Stafford Manufacturing Corp. of Wilmington, MA.

Stafford Weldable Shaft Collars & Couplings let users add features such as actuators, brackets, cams, connectors, flange mounts, levers, pins, and rods. Available in one-, two-piece, and hinged styles, Stafford Weldable Shaft Collars and Flange Mounts come in 0.25" to 6" bore sizes and Weldable Shaft Couplings are offered in 0.25" to 2" bore sizes. Smooth-, hex-, and square- bores for shafts, pipe, and tube can be supplied. Applications include the creation of custom high-strength, rigid assemblies without fasteners.

Redesigned Canto Toilet from ICERA Brings a Modern Vibe to the Bath

icerausa.com

ICERA released their latest iteration of one of its most popular one-piece toilets – the Canto. A new look gives a modern twist to this transitional model with a sculptural silhouette that is softened by smooth curves at the base and a lid shape that mirrors the lines of the matching Canto vanity.

The Canto includes all ICERA's signature plumbing technology, including the EcoQuattro™ flushing system that combines flushing power, exceptional cleanliness, and minimal water usage. As a high-efficiency toilet consuming only 1.28 gallons per flush, the Canto features an oversized 2 1/8" trapway and 3" flush valve to virtually eliminate clogging.

Armstrong Introduces the new ECM Pump-Less-Volute Repair Solution

armstrongfluidtechnology.com

Armstrong Fluid Technology recently announced an ECM Pump-Less-Volute, a new variable-speed version of the popular Gold Series Pump-Less-Volute. The new ECM Pump-Less-Volute uses a permanent magnet motor that is up to 40% more efficient than a standard induction motor. Armstrong Pump-Less-Volute kits (PLV) are a complete repair solution for Armstrong dry rotor S&H and 1050 & 1060 Series. Armstrong standard and ECM PLVs can also be used to re-build or upgrade select B&G or Taco circulator models.
