### 9. AGELESS IRON

This new hardware brand offers a line of products crafted from hand-poured molten iron. Each piece is sandblasted, deep-cleaned, and zinc-plated twice for corrosion resistance, resulting in hardware pieces weighing up to 5 pounds. The brand says the final powder coating has been tested to withstand 12 months of exposure to the most demanding climates and is both UV and salt resistant. Three levers, two knobs, three rosette/plate styles, one handleset, and matching dead bolts are available. **agelessironhardware.com circle No. 809**

### 10. DURAVIT

Expanding on its SensoWash series, the manufacturer has introduced its first shower-toilet, which combines iconic design with technical innovation such as automatic open and close, auto flush, odor extraction, and a seat sensor. The toilet is a self-contained ceramic unit with an electronic flushing system and modern bidet comfort. SensoWash functions are operated via a remote control that stores personal preferences for two user profiles, but it also can be operated via smartphone using the new SensoWash app (for Android or Apple iOS).

### 11. A.O. SMITH

The water heater manufacturer has launched a new gas residential tankless product line with X3 Scale Prevention Technology, which extends the life of the unit three times beyond traditional tankless products, the company says, making it the first tankless unit to maintain "like-new" performance without requiring regular scale-related maintenance. The X3 units operate on a ½-inch gas line, vent with 2-inch PVC, and are available in three sizes.

### 12. NATUFIA LABS

Kitchen Garden is a fully automated indoor hydroponic appliance that allows anyone to grow herbs, vegetables, and microgreens right in their kitchen all year round without pesticides. The Wi-Fi-enabled unit allows homeowners to connect via mobile device and features technology that automatically maintains light, temperature, water, and pH levels to ensure optimal plant health and optimizes all minerals, nutrients, and vitamins for the non-GMO leaves and flowers. The Kitchen Garden comes with seedpods, nursery tray, and ceramic cups.
