9. The new Mendocino freestanding tub from **NATIVE TRAILS** is made of NativeStone, a sustainable cement and jute fiber mixture, and boasts thick walls that provide insulation for a deep, relaxing experience. The available four finishes include ash (shown here), a natural gray color with natural mottling; slate, a rich, dark gray; pearl, a luminescent cream color; and earth, a warm, natural brown-gray.

10. **MTI BATHS** has expanded its line of shower bases to include one with gentle curves and slopes. The organic 6030 shower base has a low threshold for easy entry. Measuring 60 by 30 inches, the design includes an integral tile flange on three sides and is available with a left- or right-hand drain.

11. **TOP KNOBS** introduces the Ellis Collection, which is influenced by the architecture of Savannah, Ga., and includes five series of delicately detailed knobs, pulls and appliance pulls. All hardware in the collection is available in ash gray, brushed satin nickel, flat black (shown here), honey bronze, polished chrome and polished nickel.

12. **MELJAC** has a range of outlet plates that can combine several functions, including USB and Data, on a single plate. The brand's models, made of brass with a choice of 26 finishes, can be tailored to different customer needs and electrical systems. The plate is also available with chamfered or straight edges with or without visible screws.

13. The Hannah Vanity from the **FURNITURE GUILD** features a variety of interior storage spaces, including split short drawers for organizing smaller necessities, as well as double-height bottom drawers ideal for stacks of towels. Hannah, shown with Campaign hardware and inlays, comes in standard sizes from 24 to 72 inches wide with five different configurations in both wall-mounted and freestanding installations.

14. **U-LINE** introduces 24-in. Dual-Zone wine refrigerators and beverage centers. Features include stainless steel inside and out; adjustable blue-and-white LED lighting; position adjustment for wine racks, bins and shelves; and a variable speed compressor delivering maximum energy efficiency, faster temperature responses and quieter operation.

15. Jai-Alai from **CORBETT LIGHTING** blends the design of sputnik chandeliers and the world of wicker furniture in an organic, flowery silhouette. Jai-Alai is shown here in a finish of polished brass, and the shade material is made of handwoven cane.

16. The Medal Pendant from **PROGRESS LIGHTING** draws its inspiration from old industrial warehouse lights and was created to work in a number of different styles. A double glass diffuser was chosen both for its vintage look and its ability to scatter light into a soft star pattern. Medal is offered in coastal blue (pictured), brushed nickel and graphite finishes.
