## Bradford White Enhances Commercial Water Heater's Technologies

[bradfordwhite.com](http://bradfordwhite.com)

Bradford White Water Heaters has announced a new feature within the line of eF120 series commercial gas water heaters. The American-made eF120 product line now incorporates BMS and modulation technology for remote monitoring capability and increased fuel efficiency.

"We developed the new eF120 series in response to the changing market for commercial water heaters," said Louise Prader, senior director-product management for Bradford White. "Modulation and BMS are quickly becoming the standard. For industries that have high demand for hot water, from manufacturing and construction to education, hospitality and health care, the efficiency and improved fuel utilization provided by modulation can make a big difference in a small amount of time. And the option to connect Bradford White products into a building-wide network of mechanical and electrical systems improves efficiency, reduces response times and limits the risk of equipment failure."

BMS capability allows users to integrate a water heater into an automated system that controls and monitors electrical, communications, security and other systems. Within a BMS network, building and facilities teams can remotely monitor essential functions and more efficiently manage maintenance and repairs.

## Isenberg Serie 260 Introduced

[isenbergfaucets.com](http://isenbergfaucets.com)

Isenberg has introduced the Serie 260™ Collection of fixtures for basin, showers, tubs and bidets. The new collection offers an intriguing blend of structure and ease. The base of the faucet is softly curved with graceful lines inspired by gently flowing water, while the flat spout is elegant in its geometric simplicity. The overall effect is remarkable, pairing organic natural shapes with a contemporary sophistication that makes this collection a standout.

The Serie 260 is offered in an assortment of installation options to create a cohesive design space in the bath. All fixtures are crafted from solid brass and are available in four finishes. The Serie 260 line is backed by a Limited Lifetime Warranty.

## MTI Baths Introduces Leona Oval Basin [mtibaths.com](http://mtibaths.com)

MTI Baths celebrates the free-flowing forms of nature with their newest oval basin – the Leona. As the newest addition to MTI's Boutique Collection, the Leona basin is a semi-recessed model that allows only the top 2" of the sink to rest on the vanity. Its sleek minimalist vibe is a natural fit with today's trendy industrial chic look and is versatile enough to pair equally well with a contemporary, transitional or even retro design space. The sink measures 20" x 13" with a 5" bowl depth and is crafted from MTI's signature SculptureStone®. Its eco-friendly mixture of 70% organic natural stone combined with high-performance resins is non-porous, stain-, mold- and mildew-resistant, making cleaning and maintenance easy. Leona is available in material colors of white or biscuit, in either matte or hand-finished deep high-gloss, with eight optional exterior colors. The sink has no overflow and requires a vessel-style drain kit without overflow.

## Webstone Ultra-Compact Thermostatic Mixing Valves [webstonevalves.com/TMV](http://webstonevalves.com/TMV)

Webstone®, a brand of NIBCO, has announced enhancements to its line of Ultra-Compact Thermostatic Mixing Valves (TMV). Cold water bypass fitting kits are now available to pair with the matching Ultra-Compact TMV body of your choice. All products are certified lead-free and available for immediate shipment.
