OF ELEGANT HOMES
FALL/WINTER 2016

1. Showstopper

LEDs nestle within half of the bands in this modern sculptural frame, allowing for illumination sans bulbs. The other bands are lined with reflective crystals for a stunning glow. **30-inch Khloe Pendant, \$1,460, Feiss; feiss.com**

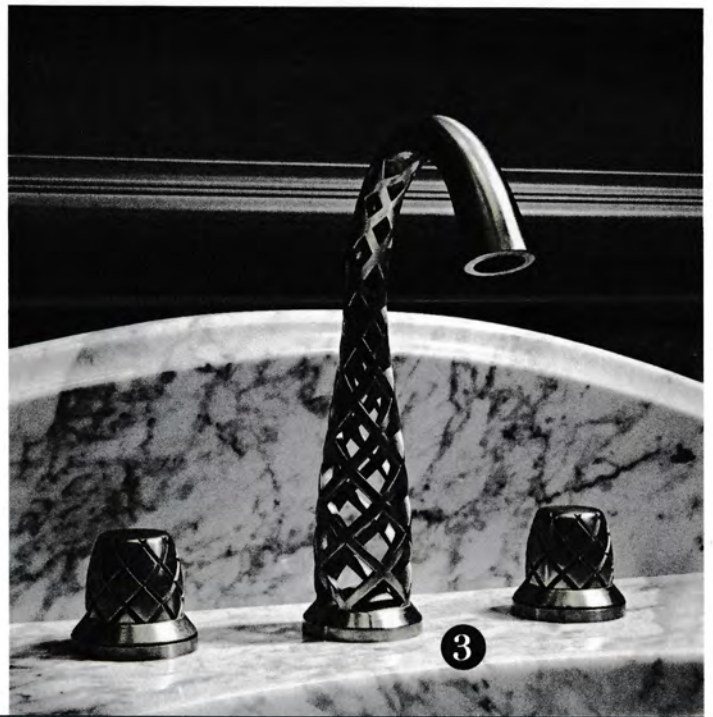

12 Innovative Products

New technologies are driving an evolution in kitchen and bath design. Today's best products are sophisticated, stylish, and smarter than ever.

2. Statement Piece

Say hello to bold color—crown your kitchen with a custom range hood crafted to your specifications. This model uses colored stainless steel made from a special manufacturing process. Specific hue in mind? Powder coating is also available to match any color. **Miami Design in Electric Blue, starting at \$17,000 (other colors start at \$8000), Rangepcraft; rangepcraft.com**

3. Optical Illusion

Water appears to sprout magically from this lacy metal faucet, which is crafted using 3-D printing technology. Water runs through tiny channels in the intricate faucet and converges just before the aerator. **Vibrato Faucet, \$19,890, DXV by American Standard; dxv.com**

4. Integrated Sink

This clever contemporary sink makes use of material cut out of a countertop during installation. The cutout piece serves as a false bottom for the sink, so the counter appears intact. Without a traditional sink drain in view, the water flows organically to the edge of the circle and drops to the sink base recessed below the counter. **Continuum Sink, \$1,125, MTI Baths; mtibaths.com**

5. Wireless Wonder

Charging a mobile device is now as easy as leaving it on the kitchen counter. A transmitter installed under the countertop sends energy to devices equipped with remote charging technology. Almost any smartphone can be charged when using one of Corian's charging rings. **Corian Charging Surface, price varies, DuPont Corian; buildinginnovations.us.dupont.com/charging-surface**

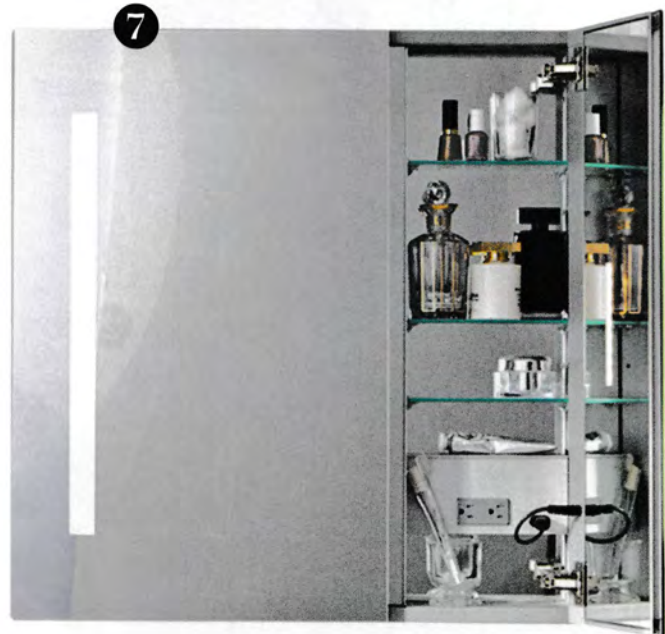

6. Modern Laminate

Laminate has never looked so luxe. Consistent color throughout this high-quality product allows for a seamless appearance that offers limitless design options for contemporary looks, such as oversize counter profiles.

ColorEdge, \$5.50 per square foot, Arborite; arborite.com

7. Mirror, Mirror

This medicine cabinet offers more than just a pretty reflection. USB ports and outlets allow you to charge a mobile device, a fitness tracker, or a razor. Stream music—or your favorite podcast—through integrated speakers. Simple yet genius solutions, such as a magnetic strip to hold small metal items, add convenience. **AiO Cabinet, starting at \$1,429, Robern; robern.com**

8. Toasty Towels

Classic style meets modern convenience thanks to this console-style sink's built-in towel warmer. There's no need to add a separate warming unit to your bath with this all-in-one solution that maintains the visual integrity of a bath's traditional design.

Heated Washstand, \$3,400, Sterlingham Co., Ltd.; sterlingham.co.uk

9. Up, Up, and Away

Most people won't even know this flush-mounted ceiling vent system is hard at work while you're cooking. Its sleek, hidden profile allows for a streamlined kitchen design.

Lux Island, \$1,799, Zephyr; zephyronline.com
