### ONE TAKE-AWAY FROM THE YEAR 2020 WAS THE EVENTUAL

realization we were all going to be spending more time at home. Increasing our comfort, relaxation and safety were and are on top of our minds and the resulting upward tick in remodeling projects proves it. Although outdoor spaces saw the biggest trend upwards, CNBC reported a 40% upward swing of kitchen and bath remodels beginning in June 2020 — and understandably so.

The bathroom offers that momentary space of solitude and comfort. It is where we can unwind from the stresses of the day with a nice hot shower or warm bath. The bathroom becomes more than just another room in our home — it becomes our safe space. We begin and end our day in our bathroom and, invariably, the experience can set the tone for the rest of our day.

*Inspired Home* went to work to explore beautiful ways for you to enhance your bathroom for 2021. Sit back, relax and soak up the beauty of the bath! ✨
