MTI Baths Introduces Adel 2 mtibaths.com

MTI Baths' newest freestanding tub, the Adel 2 features an elegant design that fits impressive style into smaller spaces. This new tub not only makes smart use of limited quarters, it also offers an infusion of therapies to create the ultimate spa-worthy experience right at home.

As part of MTI's Designer Collection, the Adel 2 is a chic freestanding tub with clean, organic lines and a thin lip with integrated faucet deck. It is available as a soaker or air bath, both featuring ergonomic interiors for sublime comfort and indulgent options to soothe the senses. The Adel 2 is handcrafted in the United States in keeping with MTI's high standards for quality and construction excellence.

A. O. Smith Mobile App hotwater.com/resources/

A. O. Smith recently announced the launch of its newly upgraded A. O. Smith Mobile App, featuring demand response and time-of-use capabilities. Once connected to the A. O. Smith iCOMM™ Remote Monitoring platform, the app allows service professionals and homeowners to remotely monitor and control their water heater to improve performance, increase savings and reduce downtime.

To learn more and download the A. O. Smith Mobile App, visit www.hotwater.com/resources/apps/.

Oatey Co. Pipe Clamps oatey.com

Oatey Co. has announced the launch of new and improved Full Clamp pipe clamps, featuring updated installation and removal features for fast and easy use.

Oatey Full Clamps are built with convenient push-on installation technology, including a lead-in edge that automatically opens the clamp. With a patented removal wedge and notch, clamp removal is also quick and simple.

The Full Clamps provide pipes complete stand-off from the surface, and 360-degree pipe protection allows tubes to expand and contract. Notched nail slots also allow for strain relief and better nail alignment.

Webstone T-Valve and Transition Fittings Eliminates Multiple Components webstonevalves.com/press

Webstone®, a brand of NIBCO®, announces new Press x FIP transition tee products, including the all-new Pro-Pal® T-Valve™. Ideal for isolating a line or device for service, it features a full port ball valve with an integrated tee fitting. Sizes range from ½" to 1" including reducing branch options. In addition, Press x PEX transition elbows and couplings are now available in 5/8" and 1" reducing sizes. All products are made from lead-free DZR brass and are compatible with popular press tools.

Squeeze Handle Kitchen **californiafaucets.com**

Putting the “squeeze” on dirty dishes, California Faucets has added the new Squeeze Handle Sprayer to their Kitchen Collection. Both ergonomic and visually captivating, the easy-to-use lever activates a powerful spray function. Simply squeeze the lever to unleash the vigorous spray function and release it to return to an aerated stream. The addition of the new squeeze lever practically doubles the array of pull-down faucet choices. The variety of available styles, combined with a selection of more than 28 artisan finishes, give at-home chefs the ability to create a distinctive design statement for the kitchen sink.

Isenberg Cascade Collection **isenbergfaucets.com**

Isenberg captures the peaceful essence of falling water with their new high volume waterfall tub fillers. These faucets fill a bath by streaming arched panels of water into the tub, and their high-volume design means a bath is ready with very little wait time. The calming sights and sounds of the rushing water help to turn an everyday bath into a restorative spa-like experience where luxury and relaxation abound. The elegant fillers are available in wall-mount or deck-mount configurations. Both are offered in an array of twenty-four stunning finishes, including traditional metallics like brushed nickel and chrome, as well as more exotic and colorful options such as matte gold, blue platinum, distressed black and deep red. These faucets are particularly well suited for renovation projects with simple ½ inch NPT connections for easy installation. The Cascade Collection also includes cascade flow shower heads.

Sloan Optimix Anti-scald Faucet Technology

sloan.com

Sloan has launched a new line of ASSE-1070 compliant faucets featuring Optimix™ anti-scald technology. When cold water is running low, faucets may dispense uncomfortable, unsafe hot water. Sloan’s Optimix technology proactively works to prevent scalding in the event of cold water failure due to the industry’s fastest and most effective in-spout ASSE-1070 compliant anti-scald technology. The new anti-scald innovation is available in Sloan’s most popular faucets—the Optima® EAF-200, EAF-250, and EAF-275. Sloan is currently the only manufacturer in the industry offering a solar-powered anti-scald faucet.
