Small Sink. Fully Loaded.

ruvati.com

Ruvati has unveiled the latest addition to their popular Roma Series of workstation sinks. Created for compact spaces, the Siena is perfectly sized to mix cocktails at a wet bar or act as an extra prep sink in a busy kitchen. Its ingenious design with built-in accessories allows the Siena to perform multiple functions in tight quarters such as an RV or Tiny House. Its clean lines and beautiful finish make the Siena an excellent addition to kitchens and bars of any size.

Like other sinks in the Roma Series, the Siena includes clever accessories that fit neatly into the basin. A stainless steel colander is perfect for rinsing veggies or air-drying dishes, and a solid hardwood cutting board covers the entire basin to easily convert sink space to a handy countertop. The Siena is offered in a range of sizes from 15" to 25" and is available with topmount and undermount installation options.

Bridgit Lead-free Solder

harrisproductsgroup.com

Bridgit® plumbing solder, manufactured by Harris Products Group, is specifically formulated as a lead-free solder to replace the 50/50 tin-lead for copper tube connections.

Bridgit contains nickel, a key ingredient used to toughen stainless steel and tool steels, for higher joint strength and excellent flow properties. Bridgit has a wide plastic range which operators will find to their advantage when filling poorly fit-

ted joints. It also has the capability of flowing through tight capillaries when joints are at or above its liquidus temperature.

Bridgit solder has solidus at 460°F (238°C) and liquidus at 630°F (332°C).

Bridgit is a patented alloy that meets all Federal Requirements for lead-free solders mandated by the Federal Safe Drinking Water Act Amendments of 1986.

QuickDrain USA Designer Drain Covers quickdrain.com

QuickDrain USA has announced the arrival of new decorative drain covers and finishes compatible across its linear and square drain collections. The additions offer more design versatility for homeowners, designers and installers with on-trend styles to suit every preference.

QuickDrain's expanded line of covers and finishes, available for SquareDrain, ShowerLine and Pro-Line drains, complements all major design trends, including mid-century modern, industrial, contemporary and modern farmhouse, making them an ideal choice for both residential and hospitality showers. From striking metallics to bold black finishes and sleek silhouettes, it's easy to mix and match QuickDrain with any bathroom aesthetic.

New to QuickDrain's line of covers are the Stones and Deco designs, each featuring intricate and modern detailing. Stones offers a soft pebble pattern made to enhance earthy,

natural aesthetics with its organic-looking texture, while Deco's sharp, geometric lines are architecturally inspired and pair well with current tile trends. Previously existing covers, Tile-In, Vertical, Lines, Stream and Cosmo, also continue to be available. Stream and Cosmo were

exclusively designed in collaboration with the world-renowned Michael Graves Architecture & Design.

Hands-Free, High Fashion Faucets gessi.com

Gessi has paired beauty and function in their new line of Sensor Taps. The complete collection of award-winning faucets features advanced technology to create a new class of hands-free faucets. The minimalist beauty and efficient performance make the touchless Sensor Taps by Gessi a stand-out in luxury bathrooms.

The Sensor Tap line includes the brand's most sought-after faucet designs in an array of finishes. A smart choice for residential, commercial, and hospitality settings, Sensor Tap faucets provide hands-free functionality for the home, and bring an upscale elegance to public spaces.

Gessi offers Sensor Taps in various configurations, including basin mixers, wall-mounted designs, or as stand-alone units with separate controls that become the bath's focal point. For more details about the benefits and beauty of Sensor Taps by Gessi, visit gessi.com.

Showered by Light

gessi.com

Gessi has reimagined the shower. With flowing water and glowing lights, the Afilo collection brings beautiful visuals to the shower experience. Fixtures appear to float in midair while diffusing soft lights amidst streaming water.

As part of Gessi's Private Wellness® Program, Afilo pairs the power of light and water to create a sensory oasis designed to refresh and restore body, mind and spirit. Chromotherapy lights shine through and merge with the falling water in a mesmerizing effect that is soothing yet invigorating, a singular experience that is the essence of wellness and renewal.

Designed as an overhead rainfall/waterfall shower, the Afilo Collection includes fixtures that may be installed recessed into the ceiling or as an exposed in a boxed design. A slot along the showerhead's perimeter is the source of the diffused light, while a thin steel outer frame and inclined inner walls reflect the light in such a way to create the "floating" illusion. Users may customize their lighting color choices. Afilo, available in an array of beautiful finishes, is an elegant and refined addition to the bathroom, subtle in appearance yet powerful and dramatic in performance.
