New kitchen and bath plumbing fixtures feature minimalist aesthetics and unique shapes

by MARY SALMONSEN

### ▲ BRIZO

The Frank Lloyd Wright Collection, created in collaboration with the Frank Lloyd Wright Foundation, features bath fixtures designed to incorporate the architect's six principles of organic architecture: simplicity, individuality, belonging, palette, substance, and integrity. This is reflected in the collection's mix of metallic and warm wood materials and innovative geometric arrangements. The product suite includes lavatory faucets, featuring a side-mounted water flow from a rectangular spout; tub fillers; shower systems; bath accessories; and a rectangular single-function raincan showerhead with integrated lighting. ### ◀ SPEAKMAN

New garbage disposals and sump pumps provide a "full line" of plumbing products for residential customers, according to the manufacturer. The garbage disposals are powered by a 1700-rpm magnet DC motor, available in ½ or ¾ horsepower depending on need, and measures 7 inches in diameter to preserve under-sink space. The sump pumps feature a ½ horsepower continuous duty operation motor, permanent split capacitor, and integrated thermal protection switch. [speakman.com](http://speakman.com)

### ▼ CALIFORNIA FAUCETS

The D Street Bath Collection aims for a "casual-yet-modern" aesthetic with a choice of atypical design elements, says the manufacturer. Altogether, the modular line enables up to 500 different design configurations. Options for the all-brass collection include three spout styles, three sizes, two handle styles (Stick, a cylindrical handle, or Tang, a geometric option), and a series of textured handle inserts in knurled, smooth, or carbon fiber textures. Each is available in a choice of 28 color finishes. [californiafaucets.com](http://californiafaucets.com)

### ▼ GESSI

Inspired by the look of theatrical spotlights, the Spotwater Collection of swiveling tubular showerheads features a sleek, unconventional silhouette that pairs well with minimalist spaces, according to the manufacturer. Each showerhead is available in a choice of four different aerators for custom water flow, including rain, mist, waterfall, and multispray. Finish options include an array of textures in copper, aged bronze, polished nickel, antique brass, and shades of white, black, and gold. [gessi.com](http://gessi.com)
