# What's New

## Tile range powered by antimicrobial technology

**DALTILE** launches its DEFEND range of floor, wall and mosaic tile products featuring Microban antimicrobial technology. The antimicrobial technology is built into the tile, so it will not wash off or wear away, resulting in a surface that is consistently protected for its entire life-time. Microban antimicrobial technology revolutionizes product cleanliness by providing lasting and powerful protection against the growth of bacteria—keeping walls, floors and surfaces cleaner longer. ## Series allows for customization of any bathroom

**DURAVIT USA** introduces a new complete bathroom series, D-Neo, which is poised to enhance everyday life. Designed by Belgian designer Bertrand Lejoly, it revolutionizes the entry-level bathroom. Offered at an attractive price point, the D-Neo series brings the brand's quality and sophisticated design to a wider audience. Offering washbasins, furniture and bathtubs, it leads with a striking, engaging and timeless design language. Intended to outlast short-lived trends, D-Neo is the perfect accompaniment to daily life. | [duravit.com](http://duravit.com)

## Super-slim drain provides minimalist aesthetic

**EASY SANITARY SOLUTIONS** revolutionizes drain installations with its new Super Slim design Xs Series Shower Drain. The Xs is a small linear drain made with German quality engineering and an exclusive Dutch design. The Xs combines state-of-the-art technology with a super-slim design for a minimalist aesthetic. The Xs Series is available in lengths of 19 1/4 inches and 47 1/4 inches and is equipped with a cleanable height adjustable siphon, which provides a very high drainage capacity. ## Reversible stair risers give interiors fresh look

**L. J. SMITH STAIR SYSTEMS** upgrades the look of an interior stairway with its Reversible Stair Risers. These risers feature a shiplap design on one side and a beaded planking design on the other, making it easy to create an entirely new look for a stair system. Made of primed poplar, the Reversible Stair Risers are 7 1/2 inches tall. Each 3/4-inch-thick riser can be ordered in lengths of 48, 54 or 60 inches. The fresh look of adding Reversible Stair Risers provides remodelers with a way to set their projects apart. [ljsmith.com](http://ljsmith.com)

## Corded auto-feed screw drivers incorporate innovation

**SENCO** re-engineers corded DURASPIN auto-feed screw drivers to increase speed and productivity, incorporating features from its recently updated cordless DURASPIN line. The most notable design innovation is SENCO's new feed system, which improves speed, usability and work quality. Screws now advance automatically after the previous drive for faster and more precise fastening. The patented Corner-Fit Feed system easily fits into tight spaces where other collated screw drivers get stuck while providing a better line of sight and easier toenailing. | [senco.com](http://senco.com)

## Tile collection features natural, earthy palette

**WALKER ZANGER** unveils Kiva, a handmade ceramic tile collection that reflects the minimalism and warmth of the desert. Kiva draws inspiration from the natural and architectural elements found in desert environments around the world. The collection emphasizes the transition toward designing with organic details that provide comfort and simplicity. Kiva's double-fire glazed white body clay shapes portray the organic forms of jutting boulders, towering buttes and soft palm trees, and it is handcrafted by artisans in San Miguel de Allende, Mexico. ## Track saw integrates kickback stop technology

**FESTOOL** exceeds expectations with even more innovation in an advanced cordless machine that ensures unparalleled accuracy cut-after-cut on the jobsite and in the workshop. The new TSC 55 K is engineered with first-of-its-kind kickback stop technology, which reduces the likelihood of kickbacks and increases user safety. The kickback stop feature immediately seizes the rotation of the motor, halting the blade in the blink of an eye. After the kickback stop automatically activates, the saw is ready for use again with zero downtime. [festoolusa.com](http://festoolusa.com)

## Units designed for flexibility, simple installation

**ALLIED AIR ENTERPRISES** announces new PRP14 and PRP16 Residential Packaged Units designed for unmatched application flexibility and simple installation. A new base rail design offers secure handling and placement in downflow applications, and upward flanges on downflow connections help water stay out of ducting. Each unit is shipped convertible-ready for downflow as well as horizontal applications, so a kit is no longer required for installation. A bottom utility entry provides application flexibility. ## Gray finish offers versatile choice for any space

**VIAGGIO HARDWARE** presents its newest finish option that meets the trend toward the color gray. Titanium Gray is a unique choice for door hardware and a simple way to add elegant style to a room. Its warm undertones and effortless blending of gray and bronze make the overall look unique. Titanium Gray is the perfect compromise for consumers who cannot decide between satin brass and matte black. It is refined and transitional yet edgy and modern, a versatile choice bound to complement any design space. [viaggiohardware.com](http://viaggiohardware.com)

## Lighting fixtures embody contemporary forms

**SCHONBEK** debuts a new addition to its Contemporary Collection, Arabesque, which is inspired by the dynamic shape of an aircraft propeller. The line of fixtures perfects the art of architectural artisanship with a two-light sconce and three chandeliers. Elaborately intertwined yet pleasingly unadorned, the arms of Arabesque extend from a hand-cut, mouth-blown Bohemian crystal central column and culminate in solid crystal faceted bobeches. A single large-faceted pendant suspended beneath the center point of the fixture casts brilliant reflections of light. [schonbek.com](http://schonbek.com)
