TREND WATCH:

10 items that make your house a home!

Wow Factor

A floor-mounted tub filler creates an immediate wow factor in the bathroom and is the perfect partner for a freestanding tub. Add a trendy industrial-style vibe and the results are truly electric. The Serie 250 tub filler by Isenberg captures that urban “exposed pipes” look with a boldly curved silhouette and knurled handles. Standing 40” tall, this dramatic unit was created in the Isenberg Design Lab by renowned designer Prakhar Kumar Jain. It features solid brass construction, single lever control of volume and temperature, and a convenient hand shower. All Isenberg products are crafted to exacting standards and carefully detailed for lasting beauty, durability and impressive performance. The Serie 250 tub filler is offered in a choice of three finishes – chrome, brushed nickel and matte black – and is a great choice for fashion-forward bathrooms that want to have a cool, edgy style.

Smart Lighting

Smartlabs has introduced Nokia Smart Lighting, a suite of switches and outlets that are designed to make smart lighting straightforward-to-buy, easy-to-install and intuitive-to-use. Incredibly versatile and featuring universal compatibility, Nokia Smart Lighting brings consumers and the trade a solution with high-end style, precision engineering and wide-ranging capabilities at an affordable price. Built for everyone to enjoy, the product line – including Paddle and Dial switches, a four-button, multi-function Keypad with optional custom engraving, Outlet and Bridge – provides for maximum flexibility with smart assistant, app and fingertip control and delivers a smart way to upgrade any home, regardless of existing fixtures, wiring, bulb type or floorplan.

Sleek & Stylish

The KALLISTA Juxtapose collection by renowned designer, Mick De Giulio, is a sophisticated take on performance kitchen design presenting a stylish faucet collection expertly crafted to delight both novice and kitchen connoisseur. The Juxtapose Wall-Mount Pot Filler is a sleek, functional design that offers maximum water flow to quickly and efficiently fill containers at a moment's notice then easily retracts back almost flush to the wall when not in use. Expertly constructed from solid brass for the strength and durability to stand up even after thousands of cycles of use and fitted with quarter-turn ceramic disc valves to eliminate spout dripping, the Juxtapose Pot Filler is available in Matte Black or Chrome, and in mixed metal options of Matte Black with Gold accents or Stainless with Polished Nickel accents.
