Fireclay Function

HamatUSA's Chelsea workstation sink combines the unmatched strength and beauty of natural fireclay with ingenious product design. This revolutionary sink integrates a classically modern farmhouse apron-front with a unique work-ledge that accommodates a range of accessories. While other fireclay workstations are limited to a straight ledge, the Chelsea's drop-ledge greatly expands the functionality of the sink, making it easy to meet the demands of today's busiest kitchens. Accessories flow seamlessly between the upper and lower level to be positioned precisely where needed - or conveniently slide out of the way. The Chelsea Workstation measures 33" x 20" with a center drain and a generously deep single basin. The sink includes a colander for rinsing produce and pasta, a rubberwood cutting board for prep work, a multi-purpose roll-up mat, a bottom grid, and strainer basket. Offered in an array of classic colors, including white, matte black, matte grey and biscuit, the sink is eco-friendly, completely lead-free, and comes with a Limited Lifetime Warranty.

Live Lighter

VELUX Sun Tunnel® Skylights are a cost-effective way to bring bright, clear, natural light to any room in your home. Here's how they work: A lens on the roof captures sunlight that bounces down a reflective tunnel to a ceiling fixture that looks like recessed lighting. The solar night light hangs inside the tunnel, capturing light via a photovoltaic panel that charges two rechargeable batteries. When the sun sets, the night light powers on small LED lights to create a moon-like glow. Installed with the solar night light kit, Sun Tunnels qualify for a 26% federal tax credit, enabling them to light the way at night, too.

Transitional Hardware

Atlas Homewares, the vibrant home hardware company, is pleased to introduce a new collection of knobs, pulls and appliance pulls: the Sweetbriar Lane collection. Sweetbriar Lane is a reinvention of the Sutton Place collection. While Sutton Place is a metropolitan classic, Sweetbriar Lane is more refined and favors a tailored look. The beveled edges of Sweetbriar Lane make this collection an ideal accent piece for transitional spaces. This 60-piece collection is available in 6 finishes, including brushed nickel, matte black, polished chrome, polished nickel, slate, and warm brass.
