Cherne larger-sized I-Series line of test plugs

Cherne Industries added larger test plug sizes within its I-Series line of Test-Ball, Muni-Ball and Air-Loc pipe plugs. The new plugs are available as large as 24 to 48 inches. Manufactured robotically, each plug's natural rubber core is mechanically bonded to its aluminum end plate, ensuring precision and consistency while eliminating failures that can result from chemical-bonding processes. In addition, I-Series plugs feature corrosion-resistant aluminum base plates with laser-etched identifiers, replacing the use of raised rubber markings that eventually wear away with usage. The plugs are lightweight, short and flexible, while offering back pressure to accommodate the range of plug sizes offered. Protective sleeves are also available for the full range of I-Series plugs, helping further preserve the plugs for extended use. **800-843-7584; www.cherneind.com**

General Pipe Cleaners Gen-Eye X-POD Plus sewer camera

The Gen-Eye X-POD Plus sewer camera system from General Pipe Cleaners now includes the Gen-Pack battery adapter, Wi-Fi transmitter and an on-screen distance counter as standard equipment. Depending on battery type and settings, the built-in battery adapter allows for up to 12 hours of operation in remote locations with limited access to power. The built-in Wi-Fi transmitter lets you view and record work on a cell phone or tablet. And using the system's USB port, you can also archive activity on flash drives. The new on-screen distance counter also shows how far the camera has traveled down a line in feet or meters. And for optimum accuracy, settings can be adjusted for full-size or mini-reel configurations. A 7-inch LCD color monitor with a sun-screen provides easy viewing in any location, and the camera has a one-touch recording for speed and convenience. **800-245-6200; www.drainbrain.com**

HammerHead Trenchless HydroGuide HG550 cable winch

The HydroGuide HG550 cable winch by HammerHead Trenchless enables operators to precisely match tonnage and speed to a job's specific requirements. The winch is ideal for slitting plastic gas pipes and pulling back new product in lines ranging from 1/2 to 2 inches in diameter. The HG550 provides infinite, proportional control of up to 5.5 tons of pulling force at payout/pull-back speeds ranging from 3 inches to 110 feet per minute. It features a data tracking system to record performance information, and documentation can be used to meet reporting requirements, support operator training programs or for internal project tracking, assessment and more. The easy-to-read, Precision Digital Job Data Recorder keeps track of line speed, distance, force and pressure, and a USB flash drive makes it easy to store and download data. **800-331-6653; www.hammerheadtrenchless.com**

HamatUSA Chelsea workstation sink

HamatUSA's Chelsea workstation sink integrates a classic modern farmhouse apron front with a unique work ledge that accommodates a range of accessories. The drop ledge greatly expands the functionality of the sink, making it easy to meet the demands of today's busiest kitchens. Accessories flow seamlessly between the upper and lower level to be positioned precisely where needed, or conveniently slide out of the way. The workstation measures 33 by 20 inches with a center drain and a deep single basin. The sink includes a colander for rinsing produce and pasta, a rubberwood cutting board for prep work, a multipurpose roll-up mat, a bottom grid and strainer basket. It's offered in an array of classic colors, including white, matte black, matte grey and biscuit, and it is completely lead-free. **833-334-2628; www.hamatusa.com**
