**01 ROCK.01**

Part of Kohler's Artist Editions, this 57-pound liquefied-rock sculpture is actually a ceramic bathroom sink made from 3D-printed clay. Artist Daniel Arsham's studio hand-casts the lav's coordinating oxidized brass fitting, which resembles a river rock.

02 MYBESPOKE

Door panels of refrigerators in Samsung's Bespoke appliance line can now be printed with whatever designers and end users dream up—including their own photos and artwork.
SAMSUNG

03 STELVIO

The surface of this 25-inch-deep soaking tub looks faceted but is actually smooth and made of Dolotek, the manufacturer's proprietary mineral composite. The material is easy to clean and resistant to UV rays and thermal shock.

04 XT INDUCTION WITH INTEGRATED HOOD

A downdraft built right into the glass cooking surface distinguishes Bertazzoni's latest induction range top from its predecessors. It retracts for a sleek sight line.

05 CENOTE

Patricia Urquiola's washbasin for Italian manufacturer Agape features an earthy refractory clay surface as a reference to a Mexican cenote, or natural cave.
