## The Curve Faucet by Isenberg

[isenbergfaucets.com](http://isenbergfaucets.com)

Isenberg has embraced a new design perspective with the release of their latest bathroom faucet known as the Curve. This collection is simple, yet memorable. Its sleek horizontal lines encompass an arched spout that is elegant, refined and modern – a distinctive choice for a style statement in the bathroom.

The Curve's flowing silhouette is deliberately simple and minimalistic. Water streams through the curved linear spout to culminate in a waterfall effect that calms the senses and infuses an aura of serenity to the space.

Designed with versatility in mind, the Curve offers left or right installation configurations. The faucet is also offered in two variations, with hands-free sensors and with deck-mounted handles. The sensor op-

tion is well suited for both residential and hospitality settings with touchless technology that make it easy to control water flow. All options are available with handles from all Isenberg collections. The faucets are available in 20 ceramic-based color options. Color finishes are oven-cured and machine-polished for a durable final product that is resistant to scratches, chips and corrosion.

## Flomatic Valves Announce Air and Vacuum MAXIAIR®

[flomatic.com](http://flomatic.com)

Flomatic® Valves has announced that the new American Iron and Steel (AIS) compliant Air and Vacuum MAXIAIR® model is now available. Featuring a strong fusion bonded epoxy coated ductile iron body and cover (including internal surfaces) with 316 stainless steel internals, this product is designed with the operator in mind for ease of maintenance and is engineered to meet AWWA Standard C512 for clean water pumping applications. Features include a two-bolt Quick Access™ cover, corrosion resistant 316 stainless steel float and trim, resilient Buna-N seating, and full nominal pipe size threaded female inlet and outlet ports.
