speaker integration, and features that contribute to overall peace of mind in the kitchen.”

Lux Connect includes a Clean Air Function that turns the hood on once every four hours for 10 minutes on speed one. This allows the hood to continuously recirculate the air throughout the day to ensure the kitchen air is clean and fresh. Lux Connect is available in white or stainless steel in 43- and 63-inches.

RUVATI

ELEGANT. EXTRAORDINARY. EPISTAGE

Ruvati builds color, character & full capability into one impressive design

Ruvati is pleased to introduce a kitchen sink collection that pairs two of today’s most in-demand features into one epic design. Known as the epiStage Series, these remarkable sinks combine the beauty and color options of granite composites with the impressive practicality of the workstation design. The result is a true masterpiece of form and function destined to be the focal point of any modern kitchen.

Crafted in Italy, the epiStage sink is an elegant choice for the kitchen. It is constructed of 80% crushed granite along with proprietary resins to form an exceptionally durable, non-porous surface with the look and feel of natural stone. This sink is perfect for those who want to venture beyond stainless steel with a range of hues, including midnight black, espresso brown and urban gray. In addition, each epiStage sink is colored all the way through for a rich, consistent look that will never fade or stain and is easily maintained for lasting beauty.

Ruvati has equipped epiStage sinks with all the functionality of their popular workstation designs. Integrated ledges along the front and back accommodate the included accessories that slide into place when needed. The clever design allows messy prep work to be done over the sink, freeing up counter space and making clean-up that much easier. Each epiStage sink comes with a solid composite cutting board with a beautifully textured finish, a foldable drying track with stainless steel bars, and a food-safe silicone grid to protect the bottom of the sink. The thick, solid construction of the sink is naturally sound-absorbing and allows it to withstand extreme temperatures up to 536° F. Available in 30” and 33” widths, epiStage sinks can be installed as a top or undermount design and have generous 9” deep single basins. As with all Ruvati products, epiStage sinks are made to exacting standards and are backed by a Limited Lifetime Warranty for years of worry-free enjoyment.

Elevate the kitchen with the epiStage series by Ruvati. Visit www.ruvati.com to learn more about this latest addition to the brand’s product line.
