SOAKER TUB LOOKS AND FEELS LIKE MOLDED STONE

The Alva tub is a new addition to the award-winning Boutique Collection by MTI Baths. The freestanding Alva has an organic oval-shaped bowl that rests snugly on a low-profile base, absent of ornamentation, for today's modern bathrooms. Alva is the embodiment of MTI's The Bath as Art philosophy that blends high-end style and beauty with personal wellness. Measuring 74 by 36 by 20 inches, the Alva is a soaker tub with a semi-rolled rim and a continuously curved interior bowl that is generously sized to accommodate two bathers with comfortably sloped backrests. It is crafted from MTI's proprietary SculptureStone, a largely organic blend of natural minerals and high-performance resins that creates the look and feel of molded stone. Each tub is completely solid with a non-porous surface that is easy to clean and resistant to stains, mold and mildew.

ELIMINATE POWER CONVERSION WITH SOLAR POWER ECOSYSTEM

SolarEdge Technologies has made available the SolarEdge Home Residential ecosystem, which includes the SolarEdge Home Hub Inverter; SolarEdge Home Battery; Backup Interface; and smart energy devices, such as the SolarEdge EV Charger. Connecting the inverter and battery on the DC side, SolarEdge Home Residential ecosystem generates more energy and offers more savings for the homeowner while eliminating unnecessary power conversions. This can add up to 10 days of saved energy for every year of use when compared to a typical 10kW PV system in self-consumption mode. The ecosystem also can optimize solar energy consumption by controlling appliance usage, both on- and off-grid. Through the mySolarEdge app, homeowners can better control, schedule, and track their energy usage and savings, considering external factors, such as weather events and rising utility rates.

DOOR LOCK CAN BE OPERATED VIA APP

Array By Hampton has released its Connected Door Lock, which is powered by the Array By Hampton app, allowing users to create personalized schedules and automations that trigger actions with other Array devices, like having Array lights turn on automatically when the door is locked or unlocked. The lock can be used with a traditional key and locked and unlocked from a smartphone or with the hidden keypad. Users can create custom codes for everyone with authorized access or one-time-use codes with the app. The Connected Door Lock works with iOS and Android devices and can pair with Amazon Alexa or Google Voice Assistant for a hands-free experience. Compatible with existing Wi-Fi, the lock is easy to set up; includes a rechargeable lithium-polymer battery that can last up to one year on a full charge; and features a five-pin, ANSI grade-2 locking deadbolt cylinder with anti-pick features for maximum security.

MULTI-SENSORY RAINHEAD IS AVAILABLE IN 14-INCH VERSION

ThermaSol has introduced HydroVive 14, a slightly smaller version of its HydroVive rainhead. HydroVive and the new smaller HydroVive 14 are designed to bring the multi-sensory powers of light, sound and water under the user's complete control. Like its 18-inch version, HydroVive 14 has a clean, integrated look, and when paired with ThermaSol's Smart Shower Valve and ThermaTouch interface, anyone using the system can personalize every element of his or her shower. HydroVive 14 delivers a gentle falling-water sensation with 120 easy-clean neoprene jets (40-80 psi, 1.8-gallon-per-minute water jets, 300 CEC Approved). Its premium Hi-Fi audio output can be adjusted for volume, treble, mid-range and bass. The rainhead is Bluetooth compatible; powered by 24V DC, 30 Watts power supply (provided); and available in 15 designer finishes (custom finishes are available upon request).
