RE-Series

The First and Only Non-Condensing Tankless Water Heater with a Built-In Recirculation Pump.

Always Detail Matters.

Rinnal is now 100% Rinnal. Rinnal's advanced tankless water heaters are now 100% Rinnal. (Manufacturing facilities under license). Like Smart-CO² intelligent recirculation, Rinnal Series 2 uses a user's hot water usage to provide recirculation. And a built-in recirculation pump. It's Rinnal's new innovation. All with no hot water, heated pipe work, venting, leaks, and other associated. Rinnal recirculation is our new recirculation technology in 2022. It's our most advanced. (Check out our new Rinnal Smart-CO² Smart mode at www.rinnal.com.)

PRODUCT FOCUS: Sinks & Faucets

SMARTFAUCET

Smart faucet

As California faces its worst drought on record, a start-up in Irvine, California, has developed a new system called SmartFaucets, a patented technology that combines the motion sensor faucets with an electronic touchpad with preset temperature and timer to override the sensor when it fails. This new system has been field tested by Marymount University of California to save 40% water plus corresponding gas, electric, paper towels and trash. By combining the smart touchpad with the motion sensor faucets, SmartFaucets can now be installed in places with only one sink.

HAMATUSA

Fireclay undermount sinks

HamatUSA launched an expansion to its Chelsea Fireclay Sinks Collection to include a new series of undermount kitchen sinks. With sleek lines and a seamless look, this particular style of sink is in high demand by homeowners and designers alike, who also love the easy counter clean-up made possible by its barrier-free design, the company notes. HamatUSA elevates the appeal of this growing trend by offering a new undermount series crafted from its own proprietary blend of fireclay material known for exceptional durability and beauty.

RUVATI

Workstation sinks

Ruvati's epiStage sink is constructed of 80% crushed granite along with proprietary resins to form a durable, non-porous surface with the look and feel of natural stone. Ruvati has equipped epiStage sinks with all the functionality of their workstation designs. Integrated ledges along the front and back accommodate the included accessories that slide into place when needed. Each epiStage sink comes with a solid composite cutting board with a beautifully textured finish, a foldable drying track with stainless steel bars, and a food-safe silicone grid to protect the bottom of the sink.

DELTA FAUCET

Modern bathroom collection

Launching in Fall 2022, Delta Faucet's Saylor Bath Collection is inspired by the clean, simple lines of modern farmhouse style and the raw functionality of everyday hardware. This collection is a blend of both traditional and contemporary design elements, the company states. It features geometric spouts that gently flare at the base and hints of industrial style in the handles. Available in two distinctive spout designs, the Saylor Bath Collection will come in Matte Black, Champagne Bronze, Stainless Steel and Chrome.
