AMCA Names Delort Associate Executive Director

Air Movement and Control Association International, Inc. (AMCA) has announced that Kimberly Delort will join the AMCA International staff as the Associate Executive Director. Delort has more than 30 years of experience and brings a wealth of financial, strategic, and operational leadership expertise. For the past 25 years, she has held positions within Underwriters Laboratories (UL), most recently as the leader of the global Operations for UL's

Building Inspection Services and Fire & Security Service Solutions teams in the Built Environment division. Delort holds a Masters in Business Administration from Roosevelt University in Chicago and is a graduate of the Executive Scholar Certificate Program and the Senior Women's Leadership Program from Northwestern University's Kellogg School of Management and its Kellogg Center for Executive Women.

SJE Announces Chad Thompson

SJE has introduced Chad Thompson as the company's Regional Sales Manager for the Southeast Region upon Tim Callander's retirement at the end of the year.

The region includes Tennessee, Virginia, North Carolina, South Carolina, Georgia, Florida and Alabama.

"I needed a change of pace and wanted to work for a great, reputable company," Thompson said. "SJE provided both." Thompson has over 15 years of experience in the water industry, seven of which have been in sales.

The SJE controls technology company includes brands CSI Controls, PRIMEX, and SJE Rhombus and serves the residential, commercial, municipal and industrial markets.

Acquabella Names Delli-Venner as Vice President

Acquabella is pleased to announce the addition of Leslie Delli-Venneri as Vice President—Architect & Designer Engagement for the North American market. With over 25 years of experience in the design world including 15 in the decorative plumbing industry, Leslie brings a wealth of expertise and a singular skillset that will play a pivotal role in helping Acquabella continue its successful launch into US and Canada. The brand is part of The Engineered Stone Group, a European holding company and global leader in engineered stone products. The Group has been headlining industry news recently with their acquisition of MTI Baths and Aquatica to join other ES Group companies including Marmite, Acquabella, F&D Group, MC Bath, Fiora and Nuovvo.

"Adding Leslie to our team fuels our momentum to be a leader in luxury bath products," said Eric Phelps, President North America—Emerging Brand Sales. "Leslie is a consummate professional with a contagious energy. She has spent years establishing relationships within the architect and design community, and she is dedicated to the bath and shower space. She has a clear vision on creating bath environments that reflect the passion of the projects. We are beyond delighted to have her on the team."

Leslie was a previous Business Development Manager for Victoria + Albert Baths and worked in marketing with the Architect and Design Community at Fisher & Paykel Appliances. She is a WELL Accredited Professional (WELL AP™), a prestigious credential signifying advanced knowledge of health and well-being in the built environment.

Caleffi Expands PRV Product Range with True Piston Valve Series

caleffi.com

Caleffi Expands PRV Product Range with True Piston Valve Series

The Caleffi 536 Series PresCal HP is the only direct-acting pressure regulating valve in North America with true piston operation and is now available for ordering. With industry exclusive technology, the 536 Series HP has a piston as the primary control mechanism, in-

stead of a diaphragm. The valve family ensures stable, high precision water pressure control while

withstanding severe inlet pressure or punishing downstream water hammer. It's perfect for staged pressure control or demanding applications that are fraught with extreme pressure fluctuations.

Two models within the 536 Series HP family are available with different pressure adjustment ranges.

Gessi Unveils the 316 Kitchen Collection gessi.com

Gessi has expanded their focus to bring their aesthetic to the kitchen with a series of inspired faucet designs. The 316 Kitchen Collection is comprised of *Mechanica* models clad in woven metal textures and *Flessa* models with a smooth, sleek base. Swiveling spouts and pull-out sprayers provide an exceptional range of movement and feature a push button to easily switch between a forceful jet spray and a softer aerated flow. Coordinating soap dispensers help to create a cohesive look and a more hygienic workspace. Mixers are equipped with ceramic disk cartridges tested to more than 10 years of function, and the sprayers are outfitted to minimize limestone deposits. Crafted from stainless steel and available in a variety of finishes.

General Introduces New Gen-Eye Micro-Scope3® drainbrain.com

The compact, lightweight Micro-Scope3® video inspection system from General Pipe Cleaners now includes enhancements to boost equipment performance, accuracy, versatility, and convenience. New, stronger pushrod permits inspections in 1-1/2" to 4" drain lines up to 100 ft. long. A sonde on the end of pushrod makes camera location easy with General's Hot Spot locator. And Wi-Fi capability lets you view and record inspections on smart phones or tablets.

General's reliable Micro-Scope3 is ideal for inspecting small drain lines, many toilet traps, and hard-to-check locations – like ducts, furnaces, and crawl spaces. Its powerful Command Module sports a big, bright 7" LCD color display. And, a handy USB port lets you archive video inspections to flash drives. The system also includes: One-Touch Recording, Digital 4X Zoom, Voice-Over Recording and Date & Time Stamp.
