Perfect Pairing

Ruvati elevates al fresco entertaining to a whole new level with the latest addition to their extensive Merino Collection of outdoor sinks. Model RVQ6290 is an ingenious combination of workstation sink and insulated ice chest – a perfect pairing that is certain to be the centerpiece of backyard parties. Crafted from marine-grade T-316 stainless steel, this ultra-durable sink is built to withstand weather extremes and is loaded with practical features that make the most of compact spaces. The innovative ice chest component really sets the RVQ6290 design apart. With double-walled construction and triple layers of insulation, this incredible sink can keep ice frozen for up to 24 hours. Its 10-gallon capacity can accommodate up to 30 cans of beer or 15 bottles of wine. Advanced technology and robotic welding ensure an air-tight seal between the layers of stainless steel, and an additional layer of exterior foam prevents condensation.

Luxury Sauna

ThermaSol®, the industry leader in steam bath equipment and technology since 1958, is enhancing its already stellar family of products with new indoor and outdoor luxury saunas. Available in three design configurations: outdoor barrel, outdoor canopy barrel and indoor, each sauna is hand-crafted from Clear Western Red Cedar or Nordic Spruce. Inspired by the brilliance of Northern European sauna technology and design, ThermaSol's latest collections offer luxurious features and exceptional detailing from the heater, lumber and accessories to mood lighting and Wi-Fi accessibility.

Expanded Views

The RailFX® Express Mount Brackets™ are an installation accessory for cable railing that eliminates the need to drill holes through each deck post. Users simply install the bracket to the outside of an end, corner or intermediate (inline) post, feed the cable through the bracket and tighten the cable to secure it. The brackets are only viewable from the outside of the deck, creating the illusion of "floating" cables from the deck view and improving sightlines to the scenery beyond. Express Mount Brackets™ work with both Classic and Low-Profile cable kits, are great retro or new construction cable railing solutions, and are DIY friendly.
