Entering Data Center Design in 2024

AI. Increasing density. New cooling tech and a move to the suburbs.
Architects at Gensler and HDR explain how these factors influence the design of data centers. 20 ▶

SOAK IT IN

Featuring a streamlined silhouette and bold geometric detailing, the sophisticated Magda freestanding tub embraces an Art Deco style. The luxury soaker's hydrotherapy package includes 20 air jets with a heated blower and a waterproof remote control. The tub is made from cast engineered stone with a proprietary mineral composite blend of organic dolomitic limestone.

ROOF FLASHING BOOT

To protect roofs from water damage caused by improperly sealed plumbing pipe penetrations, GAF is expanding its Mast Flow Pivot Pipe Boot Flashing line to include 3-in. and 4-in. sizes. The all-metal construction fully encapsulates unsightly plumbing pipes with no exposed gaskets, seals, collars or caulk that can degrade over time. Tested to withstand 110 mph wind-driven rain and Class 4 impact resistance, the system's ball/socket component design supports easy rooftop pitch adjustment.

RESILIENT PLANK FLOORING

Create supportive spaces with the Proxy Collection. PVC-free, this non-vinyl resilient plank flooring offers comforting oak visuals in soothing neutrals that support a sense of wellbeing. Declare Red List Free, carbon offset at 105% cradle to gate, and 100% free of PVC, ortho-phthalates, PFAS, halogens, plasticizers and chlorine, Proxy helps create a better environment, indoors and out.
