Bathtubs

BainUltra Libra Aurora

The **Libra Aurora** freestanding tub from **BainUltra** features softly sloped interior walls that mirror each other and provide restful lounging space for two bathers to enjoy a restorative soak. The tub's defined upper rim creates a halo-like effect and frames the top with a dramatic, elegant accent. Measuring 66 by 34 by 24 inches, this tub is offered in two configurations with a full menu of therapy options. Choose from the luxurious soaker tub or the Thermomasseur version, which provide hydrotherapy massage via 40 adjustable air jets, a heated backrest and Geysair hot air system. It is crafted from 100% pure acrylic, creating a nonporous surface that is durable, resistant to stains and scratches, and easy to clean and maintain. Tubs are available in a glossy white finish, a dramatic black and white combination, or the brand's UltraVelour matte finish. **800-463-2187; www.bainultra.com**

MTI Baths Magda

The **Magda** freestanding tub from **MTI Baths** has a streamlined silhouette and bold geometric detailing, with its only ornamentation being the fluted detailing that is distinctive of the Deco era. The tub was designed with comfort in mind and includes gently angled backrests and room enough for two bathers. Measuring nearly 66 inches long, it is offered as a relaxing soaker tub or as an indulgent air bath with a hydrotherapy package featuring 20 air jets with heated blower and waterproof remote control. It is crafted from cast-engineered stone using a mineral composite blend of organic dolomitic limestone. Its finishing process results in a nonporous surface that is durable and easily cleaned. The tub may be ordered in a glossy white finish or matte options in white, gray or black. **800-783-8827; www.mtibaths.com**

Coatings/Linings/Sealants

Flow-Liner Systems Neofit+Plus Expandable Pressure Pipe

Neofit+Plus Expandable Pressure Pipe from **Flow-Liner Systems** is a trenchless technology that creates an impenetrable barrier between drinking water and the existing host pipe. Host pipes (like lead and copper) can leach dangerous levels of toxic materials in your drinking water. The Neofit+Plus EPP structural material has been scientifically proven by examining extensive hydrolysis testing, indicating it will last well over 100 years. It often only requires a single small access pit, saving yards, trees, sidewalks and floors from demolition. The speedy process allows for many installations a day and immediate return to service. **800-348-0020; www.flow-liner.com**

FORMADRAIN Formapox 101

Formapox 101 from **FORMADRAIN** is a durable steam-cured liner that eliminates the mess and cost of traditional dig-and-replace methods. It is made from a watertight, thin, yet extremely strong composite material and a specially formulated resin. The liner is bright blue in color. It is the mainstay of the company's pushed- or pulled-in-place, steam-cured, fiberglass and epoxy underground pipe repair system. It can be used in line sizes from 2 to 48 inches. The repair is so thin that pipes sustain their original flow capacities, even with a liner installed in such small diameters. **888-337-6764; www.formadrain.com**

Oatey Hercules Megatape

Hercules Megatape from **Oatey** is a gray, all-purpose, professional-grade PTFE thread-sealing tape designed for use on a wide variety of
