The 2025 Remodelers Choice: 100 Most-Requested Products

by QR staff

RESOURCEFULNESS and ingenuity are the marks of a capable remodeler—willing and able to cobble together a fitting solution for any problem that arises. The hundreds of products posted to QualifiedRemodeler.com keep remodelers and home improvement pros versed on the new releases and product innovations that could come in handy on a jobsite or be the perfect fit for a design project, giving the property owner exactly what they’ve been looking for.

The Remodelers Choice 100 is a compendium of the most requested products published on QualifiedRemodeler.com over the past 12 months. The listed products—arranged in alphabetical order by the manufacturer’s name—generated the most clicks, pageviews, and interactions of all recently published product pages. That’s to say, they were quite popular, and for good reason.

The 100 most-requested products run the gamut from kitchen and bath to exterior and outdoor living, along with niche product categories that serve essential functions on many remodeling projects. Some are no-brainers, like many tried-and-true siding and roofing options, but others are more distinctive, such as bright and bold colors options and game-altering innovations.

A few words on methodology: *Qualified Remodeler’s* editors compiled a list of the 250 most-viewed product pages from April 1, 2024, to March 31, 2025, then filtered out those older than a few years to ensure all products were still fresh. The editors then performed a quality check on all listings, weeding out any duplicates or minor product updates that didn’t quite fit the list’s criteria. What remained were 100 products which, deservedly, garnered the most traction over the past 12 months, creating a well-rounded inventory of the most popular products. **QR**

Piping technology gives dependable solution

GF BUILDING FLOW SOLUTIONS

Americas (formerly Uponor North America) shares its latest advancement in PEX with the launch of Uponor ServicePEX for

water service applications. ServicePEX delivers clean, safe water from the main to the structure, offering a modern, dependable solution that prioritizes health, safety and performance in every installation. Available in sizes from ¾ to 2 inches, the pipe is tested and proven to highest industry standards.

Software enables designers to create, store, and convert 3D models

GOOGLE SketchUp is a 3D modeling software that enables designers to create, store, and automatically convert 3D models into 2D designs. SketchUp allows users to provide potential clients with virtual reality-based walk-through videos.

Slim windows enhance appeal of garage doors

HAAS DOOR expands window options for its commercial and residential series with SlimLine windows. The windows are available for the

company's residential and commercial 600, 700, 2000 and 5000 Series. Featuring a long and narrow profile, they offer a stylish solution for homeowners seeking to enhance visual appeal. SlimLine windows also prioritize functionality, allowing abundant natural light into the garage while still ensuring privacy and security.

Visualizer tool helps with vanity selection

HARDWARE RESOURCES arms professionals and consumers with its Vanity Visualizer to help with making educated decisions. The online tool allows users to play with different styles, colors and sizes of vanities from the company's bath cabinetry collection—which offers hundreds of options—within a virtual bath environment that reflects the bathroom space. Product pricing and dimensions are revealed throughout the process, and the platform offers print outs and spec sheets once selections are made. The interactive visualizer tool works on desktops, tablets and smartphones.

Integrated panel creates airtight thermal envelope

HENRY introduces Blueskin VPTech, a new product for residential construction that delivers energy efficiency and labor savings in one integrated solution. Blueskin VPTech

combines a weather-resistive barrier, continuous insulation, and seam sealing in a single, integrated panel. By creating an airtight thermal envelope, Blueskin VPTech can help lower a home's HERS Score as well as contribute to ENERGY STAR and Zero Energy Ready Home program requirements.

Steel doors, windows give historic feel

HOPE'S WINDOWS One55 series steel windows and doors are an ideal fit for projects requiring replication of historic steel windows.

The One55 series is distinguished by its historic, arrow-shaped profiles that combine a refined, industrial aesthetic with narrow sightlines. The series offers fully welded construction crafted with Hope's signature solid, hot-rolled steel. Customers can enhance the series with bespoke customizations to improve its resilience and efficiency.

Closed-cell spray foam achieves R-49

HUNTSMAN BUILDING SOLUTIONS

combines an R-value of 7.5 with a 6.5-inch lift to achieve a R-49 in a single pass with its Heatlok HFO High Lift spray foam insulation. It is a two-component, closed-cell polyurethane foam system commonly used as thermal insulation, an air barrier, vapor retarder and water resistive barrier. Leveraging Honeywell's Solstice Liquid Blowing Agent technology, the blowing agent offers superior yield, sprayability, adhesion and reduced gun-clogging while complying with the Montreal Protocol.

Spray foam requires no ignition barrier

HUNTSMAN BUILDING SOLUTIONS

introduces an edition to its Icynene Series, the all-new Icynene Xpress 55, which is an

open cell spray polyurethane foam insulation designed specifically for use in unventilated attics and crawl spaces. The low-density system offers a new standard in Appendix X compliant open cell spray foam and—as part of the manufacturer's I-Series—is provided to valued customers with an elevated service as well as a technical support package.

Linear drain design innovates unique circular pattern

INFINITY DRAIN

collaborates with Gensler to unveil a linear drain design inspired by the science of adhesion. The Adhesion linear drain acknowledges where water droplets stick to a variety of surfaces to form unique patterns. The modern pattern that evolved from this exploration has an even distribution of irregularity to create a look that's at once random and precise. While the connected dots are present throughout the pattern, the repeat is masked to prevent a tiling effect.

Faucet brightens kitchen with colorful hues

ISENBERG brings a modern, industrial vibe to the kitchen with the Velox K.1800 model and its graceful high-arched spout and two minimalist-inspired levers.

Colorful finish options amp up the drama with 20 different shades to choose from, ranging from sky blue, army green and deep red to more neutral options such as distressed black, steel gray and dark tan. In fact, the design team at Isenberg is capable of creating custom-colored faucets in nearly any imaginable hue.

Kitchen faucet series incorporates new finish

ISENBERG by FLUSSO offers a faucet finish that perfectly aligns with Mocha Mousse, the 2025 Pantone color of the

year. Dark Tan is a light and decadent finish with a natural tone, making it the ideal finishing touch for the Ziel K-1360 kitchen faucet. The sleek Ziel faucet is a practical chameleon constructed of premium stainless steel with a pull-down faucet and dual function sprayer with extended 16-inch reach that can easily and thoroughly clean areas around the sink.

Fiber cement siding collection debuts four profiles

JAMES HARDIE pairs its smooth, geometric Reveal Panel System with the distinctive profiles of its Artisan Siding to create its Aspyre Collection. As part of the collection launch, four Artisan Siding profiles are being introduced: Bevel Channel, Square Channel, Shiplap and Beaded Lap, which join the existing Artisan V-Groove and Lap Siding offerings. Each profile has unique features and the ability to miter corners with $\frac{5}{8}$ -inch Boards.

Fiber cement features lock joint system

Artisan V-Rustic premium exterior siding from **JAMES HARDIE** features a Lock Joint System that enables blind nailing,

eliminating the need to putty, sand or paint over face nails and reduces ongoing maintenance. With deep shadow lines, mitered corners and a smooth texture, the fiber cement siding replicates wood v-groove siding, but with the flexibility to be installed horizontally, vertically or in a soffit application.

New colors resonate with spirit of the season

KOHLER debuts three vibrant new Heritage Colors: Fresh Green (1971), Aspen Green (1978), and Teal (1987). The three recently reintroduced archival colors breathe new life into home interiors, offering a timeless elegance that resonates with the spirit of the season. Aspen Green reflects the soft, crisp nature of silver-green mountain pines. Fresh Green has bright, lush vibes that are as fresh as the garden and wild as the jungle. And Teal brings rich, vivid color back into homes.

Pocket-door hardware now easier to install, operate

KOVA releases a re-engineered pocket-door hardware option that easily retrofits on a traditional pocket-door handle cutout. Available as

part of the KOVA SELECT line, the lock is one element of an optimized pocket-door hardware assembly system that includes a more robust frame kit and a high-quality soft-close track. The hardware is available as a non-locking passage handle or as a privacy handle for integration into spaces requiring a locking option. The latch slides vertically, so locking the system requires no tight grasping, pinching or twisting of the wrist.

Drain quickens installation of freestanding tub

L.R. BRANDS announces the 1916 Collection Universal Freestanding Tub Drain to make it easier to install a free-

standing tub. The drain is the first product of 1916 Collection, a curated portfolio of bath accessories, and it works with freestanding, island center or offset tubs. When installed at rough-in, the drain offers simple installation between the P-trap and tub without needing access from below the floor. Its fit inside 8-, 10- and 12-inch joists as well as a 4-inch hole saw opening.

Storm doors raise the bar with innovations

LARSON launches two storm doors set to modernize home protection and comfort. The Lifestyle 2.0 Midview Screen Away and the enhanced Life-Core Composite Surface Single-Vent provide unparalleled performance, sleek style and ease of installation. Lifestyle 2.0 has a retractable screen that disappears above the window, providing an unobstructed view when desired. Life-Core has redesigned finger tabs on the built-in screen for better ergonomics and pinch-free grip.

Retractable screens protect porches, gazebos, covered patios

LARSON Scenix porch windows with retractable screens protect porches,

gazebos and covered patios from pesky bugs, pollen and dust. With two operable glass panels and hidden screens at the top and bottom of the window, Scenix porch windows convert the space from a screened-in porch to a three-season room on demand.

Custom shower system boosts aesthetics

LATICRETE provides even greater flexibility and design options with the introduction of its HYDRO BAN Rapid Custom Shower System. Designed to meet the growing demand for personalized shower installations, the custom components complement the full HYDRO BAN shower system suite of niches, benches, seats, curbs and other accessories. The latest addition reflects the company's ongoing commitment to delivering innovative, high-quality products.

Tankless water heater fits many needs

LOCHINVAR presents its XCalibur Condensing High Efficiency Tankless Water Heaters with X3 Scale Prevention Technology. Available in 160,000-, 180,000-, and 199,000-BTU/hour units and a Uniform

Energy Factor (UEF) of 0.95, the XCalibur line of premium tankless water heaters fits a variety of installation needs. Patented X3 Scale Prevention Technology comes standard on three XCalibur models. Other models are available with X3 Technology as an optional accessory.

Shower system offers sustainable experience

RAINSTICK introduces RainStick Lite and sets a new standard in luxurious, sustainable shower experiences. Evolving from the innovative RainStick Shower, RainStick Lite continues to uphold the commitment to sustainability by providing up to an 80 percent reduction in water and energy consumption while doubling the flow rate of a traditional shower. The original RainStick created a statement piece in the shower, whereas the RainStick Lite is discreetly installed behind the wall.

of springtime and renewal. Green pairs well with wood cabinetry and offers a dramatic contrast against common kitchen palettes such as white, black and stainless steel. Its farmhouse front shows off the lush color to its fullest advantage, ensuring the sink will be a beautiful design focal point in any kitchen.

Windows, doors meld design with innovation

REHAU introduces ARTEVO tilt-turn windows and balcony doors, an original system where modern design meets vigorous material innovations. Built from patented RAU-FIPRO glass-fiber reinforced PVC, the system allows manufacturers and specifiers to deliver bigger, stronger windows while breaking the dependency on steel reinforcement. When paired with the RAU-FLECT Low-E insert, it offers a fully recyclable solution that contributes superior performance.

Water heater incorporates design enhancements

RHEEM announces design upgrades to its award-winning ProTerra Hybrid Electric Heat Pump Water Heater line. The new design enhancements significantly reduce installation time for ProTerra. Available in 40-, 50-, 65- and 80-gallon sizes, ProTerra models include elements such as new top-of-the-tank water connections and a duct-ready design. Built-in Demand-Response-Ready EcoPort and Wi-Fi powered by EcoNet technology provide additional smart features.

ROYAL BUILDING PRODUCTS adds five new colors to its Royal Vinyl and Exterior Portfolio vinyl siding lines. Inspired by colors found in nature, the new hues—in tones of gray, blue-gray and green—reflect the latest trends in modern home design. Two new colors have been added to the Royal Vinyl line (Silver Mist, a neutral light gray, and Riverway, a light blue-gray) while three new colors have been added to the Exterior Portfolio line: Stone Harbor, a cool gray; Spruce, a vibrant green; and Smoky Ash, a warm brown-gray.

Vinyl siding lines expand color options for customers

ROYAL BUILDING PRODUCTS adds five new colors to its Royal Vinyl and Exterior Portfolio vinyl siding lines. Inspired by colors found in nature, the new hues—in tones of gray, blue-gray and green—reflect the latest trends in modern home design. Two new colors have been added to the Royal Vinyl line (Silver Mist, a neutral light gray, and Riverway, a light blue-gray) while three new colors have been added to the Exterior Portfolio line: Stone Harbor, a cool gray; Spruce, a vibrant green; and Smoky Ash, a warm brown-gray.

Soffit designed to help keep moisture out of home

ROYAL BUILDING PRODUCTS

announces the addition of a 6-inch Soffit to

its Cedar Renditions line of aluminum siding. Available in the premium, multi-tone woodgrain color offerings as well as traditional woodgrain colors, Cedar Renditions 6-inch Soffit is designed to be used in harmony with the existing 6" Cedar Renditions siding profile. Cedar Renditions is a sleek, modern aluminum accent siding that provides exceptional curb appeal without the maintenance or flammability issues of wood.

New hue elevates fireclay workstation sink

RUVATI adds an infusion of color to the kitchen with its Fiore workstation sink in a new shade of emerald green. The color evokes a sense of the outdoors, a feeling

of springtime and renewal. Green pairs well with wood cabinetry and offers a dramatic contrast against common kitchen palettes such as white, black and stainless steel. Its farmhouse front shows off the lush color to its fullest advantage, ensuring the sink will be a beautiful design focal point in any kitchen.

Kitchen design gives compelling experience

SIEMATIC debuts its Mondial kitchen design, one of the most innovative and highly anticipated new kitchens from

the iconic German kitchen brand. Mondial features a unique interplay of materials, shapes and tones blended together to create an emotionally compelling kitchen experience. The overall look is sleek yet opulent, and the expressive design speaks a minimalist, modern and geometric language of form without traditional ornamentation and stylistics.

Rafter, truss system eliminates need for ladder

SIMPSON STRONG-TIE introduces a new standard for overhead assembly installations of rafter and truss connections. The Simpson

Strong-Tie Quik Stik installation tool provides contractors with a versatile solution that makes fastening rafter and truss connections fast, safe and easy. Quik Stik and Strong-Drive SDWC Truss screws are designed to work together for a safe, reliable solution. The fully threaded shank engages the entire length of the fastener, providing a secure connection.

Tool streamlines façade renovation jobs

SPEEDHEATER SYSTEMS presents

Flexiarm, the latest addition to its range of façade renovation tools. Flexiarm is designed to make façade renovation projects faster, more efficient and more comfortable. By offering a combination of flexibility and ergonomic design, Flexi Arm enables professional craftsmen to achieve high-quality results with reduced effort as well as increased productivity. Flexi Arm is the tool to make façade renovations a smooth and efficient experience.

Panels simplify interior thin-brick installation

SPEEDYMASON Peel n' Stick panels install directly over existing sheetrock or wall sheathing and, once the first panel is level, there is no need to run string

lines. Adhesive is already applied to a panel, and any thin brick product can be used on the panels. Install an interior accent wall in six steps: fasten the 16- by 48-inch panel to the wall, remove its release liner, lay out the thin brick, place the bricks on the panel, grout the joints and, finally, strike joints. The grout locks around the brick into the Peel n' Stick panel.
