The 2026 Remodelers Choice: 100 Most Popular Products

by QR Staff

REMODELERS are known and trusted for their resourcefulness and reliability. They keep homeowners happy by finding effective solutions to challenges that arise during all project stages. The hundreds of products featured on *QualifiedRemodeler.com* help remodelers stay current on new releases and product innovations each year. The right product can be the long-sought solution to a recurring problem, or the perfect design fit for a client's vision.

The Remodelers Choice 100 is a compilation of the most requested products published on *QualifiedRemodeler.com* over the past 12 months. Products were selected based on clicks, pageviews, and other interactions with recently published product pages. The final list is arranged alphabetically by manufacturer name.

The 100 most-viewed products span kitchen and bath, exterior and outdoor living, and all other remodeling categories. Some are tried-and-true offerings from large companies and well-known brands. Others are newer products, published within the past 12 months, or from smaller brands offering fresh options for remodelers seeking new solutions.

The methodology was straightforward. *Qualified Remodeler's* editors compiled a list of the 250 most-viewed product pages from April 1, 2025, to March 31, 2026, then filtered out products more than five years old to ensure the final list remained current. Editors then reviewed the listings for quality, removing duplicates as well as products with only minor updates to previously introduced products and others that did not meet criteria. The result is a well-rounded inventory of 100 products that generated the strongest engagement over the past year. **QR**

Sliding glass door offers expanded panel sizes

PGT CUSTOM WINDOWS AND DOORS, part of MITER Brands, announces larger panel sizes for its WinGuard Aluminum Preferred

View Sliding Glass Door. The door now offers panels with up to 60 square feet of glass in sizes as large as 6-feet wide by 10-feet tall or 5-feet wide by 12-feet tall. All sizes up to 12-feet tall are offered in bypass and pocket configurations, while 90-degree or 135-degree corner configurations are available for doors with panels up to 10 feet in height.

Manufactured stone provides versatility for outdoor spaces

PROVIA manufactured stone is a versatile backyard building block.

Our stone can be used as a structural element in providing privacy for a pool or hot tub, as fencing for an enclosure, and for garden borders, retaining walls, or patio surrounds. Outdoor gathering spots can employ ProVia stone veneer in creating traditional campfire pits or raised fire tables, and as an outdoor stove or barbecue grill base. ProVia has a stone profile and color palette to enhance and elevate any exterior space.

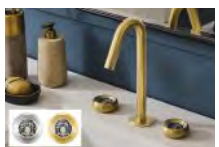

Visualizer tool simplifies design process

The **PROVIA** Visualizer simplifies the design process, allowing your customer to preview product options before making a big investment.

In the digital Design Center, homeowners can collect color palettes, save images, and create a Vision Board. With the Visualizer, they can upload a photo of their own home and experiment with door, window, siding, stone, and roofing product options to design their dream home exterior.

Deck framing engineered for professionals

PROWOOD launches TrueFrame Joist, a deck framing solution featuring enhanced preservation treatment with proprietary additives, ensuring less checking, greater stability, and straighter boards. Available in 2x8, 2x10, and 2x12 in lengths of 12, 14, 16, and 20 feet, TrueFrame Joists deliver optimal spans and consistent sizing for dependable framing. Each joist is factory-planed within $\frac{1}{16}$ inches for flat edges and uniform sizing, ensuring a straight and stable installation.

Bathroom faucets showcase watch-face handles

The **RUVATI** Chrono faucet collection embodies a time-inspired design with its unique watch-face handles, making it a striking and

fun addition to any bathroom. Featuring smooth, ergonomic twist handles, the Chrono collection ensures ease of use while providing a bold statement piece in the bath. Constructed from durable brass, Chrono faucets are available in a stunning brushed gold finish and brushed nickel, crafted to coordinate with sinks and other stainless steel fixtures.

Shaker doors expand popular cabinetry line

SAUDER CABINETRY builds on the success of its Evolve line of cabinetry with new Evolve Shaker Doors. The addition brings a fresh twist to the timeless

Shaker style, combining classic design with modern craftsmanship. The Evolve line also boasts new Dovetail Drawers, which are engineered for enhanced durability and a touch of luxury in multifamily and custom home applications coupled with new hanging vanities that blend form and function to redefine storage.

No-spline screen porch system

SCREENEZE from Home Improvement Systems, Inc is a no-spline screen porch system. It consists of a vinyl cap and aluminum base that snap together to secure screen fabric. It can span a panel up to 150 square feet with no obstructions or support posts and can withstand wind gusts up to 150 mph.

Showerhead mitigates mold, bacteria growth

SHOWERCLEAR announces its revolutionary showerhead that solves an overlooked problem with an ingeniously simple design.

With the press of a latch, the showerhead's faceplate swings open like a book, allowing trapped water to drain completely and fresh air to circulate and dry the channels and surface completely before the next use. By preventing mold and bacterial growth, the showerhead helps keep bathroom air fresher and water clearer for a healthier environment.

Kitchen cabinetry creates optical balance

SIEMATIC combines traditional and modern style elements into a timeless kitchen with the Classic Style Collection. It blends familiar ornamental designs with clear surfaces, unites elegant colors with metal, glass and stone, and complements a linear, symmetrical architectural style with decorative accents. The collection goes beyond traditional kitchen planning, presenting different styles that can create a harmonious overall composition from seemingly adverse design elements.

Beam hanger supports mass timber structures

SIMPSON STRONG-TIE announces the Simpson Strong-Tie HSKP heavy seated knife plate, a high-capacity, welded concealed beam hanger for

mass timber structures designed to meet heavy loads while providing a hidden-connector, wood-only design aesthetic. Engineered to meet some of the heaviest mass timber beam loads, HSKP is an easy-to-install connector that can accommodate larger mass timber beams and still provide a secure wood-to-wood or wood-to-steel connection.
